(6-22-48)

AIR FORCES SPECIAL NOTICES

AIR FORCE DATA: Advice covering Air Force fields or Air Force operations on civil fields, or Air Force radio facilities, and also Air National Guard fields and facilities should be forwarded to Commanding General, Air Transport Command, Attention: Flight Operations Division, A-3. Requests for approval of the closing of Air Force airfields or restrictions in airfield facilities to transient military aircraft for over 10 days should be forwarded to the same address for submittal tc Chief of Staff, USAF, as required. Restrictions in Air National Guard Fields or facilities will be forwarded to the National Guard Bureau through the State Adjutant General for approval. That Bureau will forward approved restrictions to the above address for publishing. Information to be published will be coordinated and submitted to the Civil Aeronautics Administration.

In connection with the above the attention of all base operations officers is invited to AF Regulation 55-12 of February 20, 1948, subject, "Notices to Airmen", and to AF Regulation 5-16 of February 20, 1948, subject, "Responsibilities for Flight Publications".

AIR FORCE OFFICIAL BUSINESS: Air Force official business within the meaning of AF Regulation 85-2 is interpreted as the necessity for personnel aboard an aircraft to contact personnel, units, or organizations at or near the airfield selected for landing for the purpose of conducting transactions in the service of, and in the interest of, the United States Government. This does not include the use of an airfield by transient aircraft for the purpose of obtaining clearance, service, or other items attendant with itinerant operations. Cross country flights for the purpose of maintaining flying proficiency are not considered to be official business within the meaning of this regulation.

AIR FORCE FOREIGN CLEARING STATIONS: Under the authority of AF Regulation 60-8 of August 28, 1947, U.S.A.F. aircraft with destinations listed below or returning therefrom to the United States will clear through the stations indicated: AFRICA & AZORES - Brookley AFB, Ala., MacDill AFB, Fla., Washington National Airport, D.C., or Westover AFB, Mass. ALASKA - McChord AFB, Wash., or Great Falls AFB, Mont. BERMUDA - Mitchel AFB, N.Y., Brookley AFB, Ala., MacDill AFB, Fla., Washington National Airport, D.C., or Westover AFB, Mass., or Fairfield-Suisun AFB, Calif. CANADA - Great Falls AFB, Mont., Brookley AFB, Ala., McChord AFB, Wash., Washington National Airport, D.C., Selfridge AFB, Mich., or Westover AFB, Mass. CANAL ZONE, CENTRAL AMERICA, MEXICO, & SOUTH AMERICA - March AFB, Calif., MacDill AFB, Fla., Kelly AFB, Tex., or Brookley AFB, Ala. CARIBBEAN - Brookley AFB, Ala., Kelly AFB, Tex., or MacDill AFB, Fla. ENGLAND, GREENLAND, ICELAND, & NORTH IRELAND Washington National Airport, D.C., or Westover AFB, Mass. NOVA SCOTIA & NEWFOUNDLAND - Washington National Airport, D.C., Westover AFB, Mass., Selfridge AFB, Mich., or Brookley AFB, Ala. HAWAII - Fairfield-Suisun AFB, Calif. EUROPEAN THEATER - Brookley AFB, Ala., MacDill AFB, Fla., Washington National Airport, D.C., or Westover AFB, Mass.

V.H.F. CHANNEL ASSIGNMENTS: Following are USAF assignments:

CHANNEL	AF FREQUENCY	CHANNEL	AF FREQUENCY
A	116.1	H	134.10
B	126.18	U	108.3
C	137.88	V	108.7
D	140.58	W	109.1
G	137.70		

MINIMUM SAFE ALTITUDES ON AIRWAYS: Under USAF Regulation 60-16 and policy of USAF, minimum safe altitudes for flight along airways will be identical to those established by the Civil Aeronautics Administration. Action is being taken to amend pertinent USAF flight information publications to show these minimums.

✓ Indicates new or revised Special Notices

IFR CLEARANCE MINIMUMS FOR CIVIL FIELDS: For IFR clearance to civil fields when minimum altitude over field is not shown on let-down chart contained in T.O. 08-15-3, or Pilots Handbook, USAF policy states that the "REGULAR - DAY" minimum as shown in CAA Flight Information Manual will apply. Necessary action is being taken to amend all charts to show the proper minimums.

OFFICIAL AIR FORCE FIELD DESIGNATIONS: The official names and designations of Air Force Fields have been changed to new designations by the Department of the Air Force General Orders No. 2 of January 13, 1948. The abbreviation "AF Aux." stands for Air Force Auxiliary Field and the abbreviation "AFB" is for Air Force Base.

✓ **POLICY ON CONTROL TOWER PROCEDURE:** In the interest of decreasing communications load, the practice of tower traffic controller requesting information from incoming aircraft on highest rank aboard will be discontinued. This information will be included in transmission of flight plan over Plan 62 facilities. Other essential information not normally included in flight plan, such as indicating VIP's, will be noted in remarks column and similarly transmitted.

UNAUTHORIZED USE OF VHF EMERGENCY FREQUENCY (140.58 MC): The attention of all operations offices and pilots is invited to AF Letter 100-31, of January 13, 1948, subject, "Unauthorized Use of VHF Emergency Frequency (140.58 mc)".

DIRECT PILOT WEATHER FORECASTER COMMUNICATIONS SERVICE: Direct radio communication between military pilots and AWS weather forecasters is provided at locations and on frequencies given below. This service should be used only for those emergency occasions when the pilot considers direct communication with the weather forecaster is necessary for procurement of special weather data. In normal cases the weather sequences available from Airways Stations and Radio Range Stations is considered adequate.

Procedure: Establish contact with the Military Airways Station on the appropriate frequency and request connection to the weather forecaster:

Location	Frequency (VHF)
Langley Airways, Langley AFB	C
Tinker Airways, Tinker AFB	CAD
March Airways, March AFB	C

✓ **CORRECTIONS FOR AND ADDITIONS TO USAF T.O. 08-15-1:** (1) Correct page 42, by showing (*) for Tinker AFB indicating instrument letdown procedure published. Show also bearing and distance 72°, 12.5 mi Tinker AFB "from Oklahoma City range" in addition to present listing.

(2) Correct page 90, by changing name of Roosevelt, Okla. VHF radio range to Hobart.

(3) Correct page 87, by showing hrs of operation of Spokane AFB, Wash., as cont. during IFR; 0800-1700 Mon thru Fri; on 30 min notice other hrs.

(4) Correct Willow Grove NAS, Pa. listing by showing control twr manned 0800 to sunset daily. No voice on radio range after sunset. (Note to AMC: This information together with "Navy GCA avail., see page 88", should be shown in remarks column).

(5) Correct page 38, by showing voice fac of lclzr at Weeksville NAF oper only on req and by non-certificated operators.

(6) Correct page 66, Burbank Lockheed, by showing ident of Chatsworth LFM as (. - - - -)

(7) Correct Canadian data as follows: (a) Page 20 - Vancouver, B.C.-RCAF stn CGR operating on 4400, 3202.5, 6240 kc cont; also on 5785 kc on req. (b) Page 4, Broadview, Sask. Class of radio range: BRAZ; River, Man.-Class of radio range: BRAZ; Swift Current, Sask.-Class of radio range: BRAZ. (c) Page 10, Montreal, Que.-ILS on Channel Y, approach bear. 104°, ident. "UL"; Quebec, P.Q.-Bear, stn to field: 63°. (d) Page 12, Toronto, Ont.-ILS on Channel Y. Approach bear. 324°, Ident. "YZ". (e) Page 20, Vancouver, B.C.-Tower no longer guards Channel A. (f) Page 6, Gander, Nfld.-GCA unit is avail. on req. Unit operates on 3105,3017.5,4495,6210 kc, 116.1,118.1,119.1,126.18 mc. (4-22-48)

NAVY SPECIAL NOTICES

NAVY DATA: In accordance with Hydrographic Office Memorandum for Aviators No.9, July 29, 1946, Hydrographic Office information concerning naval and marine corps air stations and facilities, including changes in field facilities, operation rules, air/ground communications facilities, instrument approach procedures and navigational aids, should be directed to: The Division of Air Navigation, Hydrographic Office, Washington 25, D.C., for transmittal to the C.A.A. In accordance with Aviation Circular Letter No. 96-46 of June 13, 1946, approval for the closing of any naval or marine corps air station or facility to transient military aircraft for a period in excess of 10 days must be obtained from the Chief of Naval Operations. Also, approval is to be obtained from the Chief of Naval Operations before relocation or modification of any aid to air navigation, such as reorientation of radio ranges.

V.H.F. CHANNEL ASSIGNEMENTS: Following are Navy assignments:

CHANNEL	NAVY FREQUENCY	CHANNEL	NAVY FREQUENCY
1	116.1	6	134.64
2	142.56	7	143.64
3	126.18	8	142.02
4	137.88	9	142.74
5	143.28	GUARD	140.58

RESTRICTIONS ON NAVAL AIRCRAFT AT LA GUARDIA FIELD, INTERNATIONAL AIRPORT, AND NEWARK AIRPORT: La Guardia Field, N.Y., New York International Airport, N.Y., and Newark Airport, N.J., are closed to all Naval air traffic except that involving urgent official business which cannot be properly handled by landing at Floyd Bennett Field.

CIVIL SPECIAL NOTICES

CIVIL DATA: The Airman's Guide covers primarily two broad fields of civil airport information, namely so-called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout, servicing, lighting, or permanent obstructions of existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or constructions, or merely a burned-out obstruction light or a runway partially unusable because of construction.

Obviously, temporary hazardous conditions should be reported to the aeronautical public at once. The necessity for reporting additional aids or minor changes in existing aids, however, isn't nearly as cogent. In other words, a temporarily closed airport is ordinarily of much more importance from a safety viewpoint than is a new airport, and the aeronautical public should be told about it as expeditiously as possible.

Notamizing of advice covering a field unusable because of flood or snow, a runway closed because of construction, or the erection of a pole-line in an approach, doesn't necessitate an engineering background on the part of the reporter. Too, safety frequently necessitates the notamizing of such advice before an official check can be made. On the other hand, advice covering permanent airport data changes, such as a new airport, or a lengthened landing strip, or an additional hangar, obviously doesn't require the same expeditious transmission to the aeronautical public, and the data may be checked from an engineering standpoint and for standardization before being publicized.

SUMMATION: (a) Since the aeronautical public should be immediately advised of hazardous conditions, reporters should utilize the CAA Airways Communications Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a notam and for further transmission to the publishers of the Airman's Guide.

(b) Permanent airport data changes (as differentiated from temporary hazardous conditions) should be reported to the appropriate CAA District Airport Engineer for coordination before they are included in the Airman's Guide.

DIRECTORY OF AIRPORT NOTAMS: Because of space limitations, the airport directory perforce serves as a notam supplement. Notam data revising previous directory issues are indicated by prefixed arrows. The only airport data (other than temporary conditions) carried in the Notices to Airmen section are coordinates (latitude and longitude).

ACKNOWLEDGMENT OF SUBMITTED AIRMAN'S GUIDE DATA: An under-manned staff prevents an individual acknowledgment of data submitted for inclusion in the Airman's Guide by telegram, teletype dispatch, or letter. Your cooperation in permitting a Guide citation to suffice as an acknowledgment will be appreciated.

CIVIL USAGE OF MILITARY FIELDS: USAF and Navy fields are open to civil fliers only in emergency or with prior permission of the commanding officers thereof.

✓ CIVIL USE OF MILITARY GCA UNITS: It must be recognized that, while Navy and Air Force GCA units may be used by civil fliers in emergency or by prior arrangement with the C.O. of the fields having such units. CAA-established civil ceiling and visibility minimums of 400' and 1 mile respectively are mandatory, except in emergency.

✓ RE-ACTIVATION OF DANGER AREAS: Many new danger areas are being activated and the activity of existing ones is being intensified. Several recent near-accidents and complaints from Army, Air Force, and Navy installations about danger area violations serve to re-emphasize the importance of avoiding such areas.

With the cessation of war the majority of danger areas could be, and were, entered or flown over with impunity. Today this is no longer the case. Do not enter a danger area without prior permission! Be sure your charts spot all new areas!

USE OF AIRPORT UTILITY FREQUENCIES - 121.9 AND 121.7 MCS: The airport ground control frequencies of 121.9 mcs (standard civil channel) and 121.7 mcs (alternate channel) are provided to eliminate the frequency congestion caused by numerous radio contacts between the tower and taxiing aircraft and the tower and airport utility vehicles thus providing a clear VHF channel for arriving and departing aircraft. The ground control frequency is used for the issuance of taxi information, clearances, and any other contacts between the tower and aircraft or vehicles operating on the airport.

Landing aircraft should guard the appropriate ground control frequency (normally 121.9 mcs) as soon as the aircraft has cleared the active runway. At locations where a ground control frequency is not available or the aircraft is not equipped with the VHF ground control channel, the tower will handle all transmissions to aircraft on the ground over its low frequency channel (278 kcs or equivalent). Departing aircraft should communicate with the control tower on the appropriate ground control channel (121.9 or 121.7 mcs) for taxi and clearance information and should remain tuned to that frequency until the pilot is ready to request take-off clearance. At that time, the pilot should communicate with the tower on the appropriate airborne VHF channel. Further communication with the tower, if necessary, should be made on the latter frequency. Aircraft not VHF equipped should guard the tower low frequency channel (278 kc or equivalent) for taxi information and take-off clearance.

V.H.F. IFR FLIGHTS: Until further notice, Air Traffic Control will be exercised on the assumption that aircraft are utilizing intermediate frequency radio ranges.

If a pilot desires to conduct IFR flight using VHF ranges over all or a portion of the route, his flight plan should so indicate. Further, flights should not be conducted on civil airways in IFR weather using VHF ranges unless the A.T.C. clearances so authorize.

(6-22-48)

PRIVATE FLIER VHF FREQUENCIES: CAA Communications Stations and Towers grd the private flier frequencies of 122.1 mc for transmission to CAA Communications Stations and 122.5 mc for transmission to CAA operated towers.

CAA Communications Stations normally reply to itinerant aircraft on the voice feature of the range, low frequency or VHF, whichever is applicable. Replies are made on 111.1 mc if VHF reply has been requested on other than range frequency. CAA airport control towers will reply to itinerant aircraft on towers' low frequency or on one of the frequencies in the 118.3 to 121.3 mc band as cited in the "Transmitting Frequencies and Identifiers" listing on page VI.

RADIOTELEPHONE COMMUNICATIONS: The word ROGER in radiotelephone communications means "I have received all of your last transmission", and its use in any other sense by CAA stations and towers is not authorized. In order to avoid confusion it is suggested that pilots engaging in air-ground contacts also limit the use of ROGER to acknowledgment of transmissions.

Pilots enroute are requested to avoid, if possible, calling airway communications stations at or about 15 and 45 minutes past the hour (which are the scheduled broadcast times) to request weather information, as such calls may delay starting of scheduled broadcasts and cause inconvenience to other persons who are dependent on the broadcasts for weather reports.

VISUAL-AURAL RANGE (VAR) MONITORING: Only visual courses of VAR facilities are monitored continuously.

RADAR BEACONS: The radar beacon is an electronic beacon designed to serve as an aid to aircraft navigation for such aircraft as are equipped with proper radar equipment. Its purpose is somewhat similar to ordinary low frequency radio ranges, but radar beacons furnish more information. From a radar beacon signal, the radar operator of an aircraft can obtain both the range and azimuth of the beacon. The signal is also coded, so the particular beacon can be identified by reference to a chart or radar beacon list. Thus, the radar operator can obtain rapidly a navigational "fix". Microwave beacons transmit only when interrogated by a special radar pulse length reserved for this function alone.

The essential difference between a radar and a radar beacon is that, unlike the radar, which depends on a reflection of its own energy to determine the existence and position of an object, the radar beacon is made up of a receiver-transmitter combination which sends out a coded signal when actuated or "triggered" by a radar signal of the proper frequency in order to receive the radar beacon signals "triggered" by the radar set.

An advantage of radar beacon is that a single beacon in an area will enable aircraft to navigate under all weather conditions if fitted with the necessary radar interrogating equipment, and at a much greater range than radar alone.

"Racon List, Book I", Hydrographic Office Publication No. 520, gives location, code, operating agency, and all information necessary to use these radar beacons.

BONE-SHAPED (DUMB-BELL) FAN MARKERS: The bone-shaped fan markers have been commissioned primarily for approach control purposes as they provide a more definite holding pattern being only 1-1/2 miles wide through the center of the pattern instead of 3 miles as in the elliptical shaped fan marker. Eventually all approach control fan markers will be bone-shaped. In some cases fan markers taken over from other agencies, especially the Navy, are not used for approach control purposes even though they have the bone-shaped pattern which will be retained.

USE OF THE ILS GLIDE PATH: The glide path course is normally adjusted to 2.5° to 3° above the horizontal so that it intersects the middle marker at about 200 feet and the outer marker at about 1100' above the ground at touch-down point. In addition, to the desired path, all glide path facilities inherently produce five additional courses at high vertical angles (the lowest at approximately 16°).

The proper use of the glide path facility requires that the pilot maintain alertness as the glide path intersection is approached and interpret correctly the "fly-up" and "fly-down" instrumental indications to avoid the possibility of attempting to follow one of the higher angle courses.

Provided that procedures are correctly followed and fliers are properly indoctrinated in glide path instrumentation, the fact that these high angle courses exist should cause no difficulty in glide path navigation since they will not be encountered.

INSTRUMENT LANDING SYSTEM (ILS) APPROACHES: Pilots are requested to give advance information to Air Traffic Control when planning to make an ILS approach, upon reaching the reporting point preceding the holding fix at airport of intended landing. This will permit assignment to the proper holding pattern and eliminate unnecessary delays in landing. Failure to use this procedure, however, will not preclude the pilot's right to request an ILS approach after reaching the holding point if weather conditions or other factors make such request advisable.

INSTRUMENT APPROACH LIGHT SYSTEMS: Normally neon approach light systems will be operated regardless of the runway being used whenever the light intensity is equivalent to that between dusk and dawn, day or night, regardless of weather conditions or when otherwise necessary or requested.

PROCEDURE FOR INDICATING TEMPORARY LANDING AREA HAZARDS AT C.A.A. INTERMEDIATE FIELDS:

(A) When entire field is unsafe two red flags (days) and red double flashing warning lights (nights) will be prominently displayed from opposite corners of the beacon tower platform.

N.B. All normal fields markings, boundary, approach, obstructions lights, etc. will remain unchanged and will be lighted as usual.

(B) When a portion of the field is unsafe, 2 red flags (days) and red double flashing warning lights (nights) will be displayed from opposite corners of beacon tower. The usable landing area will be outlined with red flags and white lanterns with two white flags and two green lanterns at each end of usable runway indicating best approaches. The remainder of field (unusable portion) will be spotted with red flags. All normal field markings, boundary, obstruction, etc. will remain unchanged except green approach lights will be replaced with red approach lights.

(C) When a small portion of the field is unsafe, two red flags (days) and double red flashing warning lights (nights) will be displayed on opposite corners of beacon tower. Red flags and red lanterns will outline hazard area with several red flags and red lanterns within area.

(D) When one runway is unsafe, two red flags (days), two red lanterns (nights) will be displayed from opposite corners of beacon tower. The unsafe runway will be marked off from remainder of field by a row of red flags and a row of white lanterns with red flags and red lanterns spotted in unsafe area. Green lanterns will mark approach to shortened safe runway with normal green approach lights changed to clear. The green approach lights of unsafe runway will be replaced by red.

SEAPLANE FACILITY DIRECTORY: A Directory of Seaplane Facilities, listing all bases and anchorages on record with the C.A.A. as of April 15, 1948, is available to seaplane owners and operators. Copies have already been distributed to all C.A.A.-recorded seaplane facilities. Owners, or others having justifiable need for the directory, should address their requests to: Office of Aviation Information, Attention: A-258, Civil Aeronautics Administration, Department of Commerce, Washington 25, D. C.

FLIGHT INFORMATION MANUAL USE OF "WRP" IN CLASSIFYING THREE-LETTER LOCATION IDENTIFIERS: The contraction "WRP", as used in Chapter I of the current Flight Information Manual, indicates merely a visual reporting point (as distinguished from compulsory or non-compulsory reporting points, which are radio fixes). These WRPs (which should have been classified VRPs) were established at the request of the airlines for their own use.

FLIGHT INFORMATION MANUAL SUPPLEMENT: Flight Information Manual Supplement, dated April 15, 1948, supersedes in entirety Chapters XII and XIV of the January 1, 1948, Flight Information Manual. At the time the January 1, 1948, Manual went to press the

(6-22-48)

Minimum Enroute Instrument Altitudes and Instrument Approach Procedures were being revised in accordance with the recommendations of the President's Special Safety Board. This Board raised minimums in many cases, and these revised minimums are all reflected in the Flight Information Manual Supplement of April 15, 1948.

✓ CORRECTIONS AND CHANGES FOR FLIGHT INFORMATION MANUAL SUPPLEMENT DATED APRIL 15, 1948: (A) Instrument Approach Procedures-Low Frequency Ranges:

(1) ABILENE, TEX., Abilene Air Terminal: Change remarks column to: Climb to 3800' on S leg within 10 mi. CAUTION: 2754' MSL twr 11 mi. S of arpt on pull-out leg.

(2) ATLANTA, GA., Atlanta Airport (Procedure #1): (a) Add min. initial approach from: SE-1600' (ILS OMK)(Final); (b) Change procedure turn min. alt. to 2000' at all given distances.

(3) AUSTIN, TEX., Mueller Airport: Add min. initial approach from: NW-1500' (Lake Travis FM)(Final).

(4) COLUMBUS, OHIO, Port Columbus Airport (Procedure #1): (a) Change procedure turn min. alts to 2300' at all given distances. (b) Correct mag. bearing, stn to arpt, to 84°.

(5) DES MOINES, IOWA, Des Moines Arpt: (a) Change procedure turn min. alts to: 10 mi-2100', 15 mi.-2200', 20 mi.-2200', 25 mi.-2200'. (b) Change straight-in minimums to: 500', 1.0-500', 1.0. (c) Change remarks column to: Climb to 2500' on N leg.*If procedure turn accomplished beyond 10 mi, alt inbound to Indianola FM is 1700'

(6) GREENVILLE, S.C., Greenville Airport: (a) Change min. initial approach alt from the E to 3000' (SW leg Spartanburg). (b) Change remarks column to: Climb to 3000' on 55° mag. within 15 mi.;turn left, intercept N leg of Greenville range, then proceed S.

(7) LINCOLN, NEBR., Lincoln Airport: (a) Change procedure turn min. alt at 25 mi. to 2600'; (b) Change regular minimums to: 500', 1.5-500', 1.5; (c) Change straight-in minimums to: 500', 1.0-500', 1.5.

(8) OMAHA, NEBR., Omaha Airport: (a) Change procedure turn min. alts to 2300' at all given distances; (b) Change remarks column to: Climb to 2500' on SE leg within 25 mi. CAUTION: 1260' MSL bluff, 1 mi. NE of arpt. 1730' MSL twr 4.5 mi. W of range.

(9) PEMBINA, N.D., CAA Int. Field: Change min. initial approach alt from the N to: 2000' (Winnipeg Range).

(10) SILVER LAKE, CALIF., CAA Int. Field: Change min. initial approach alt from the NE to: 9500' (Las Vegas Range).

(11) SIOUX CITY, IOWA, Sioux City Airport: (a) Change min. initial approach alt on secondary fix from the S to: 1900' (Sloan FM)(Final); (b) Change procedure turn min. alts to 2400' at all given distances; (c) Change min alt over range on final approach to 1900'; (d) Straight-in approach not authorized (NA) day or night.

(12) SIOUX FALLS, S.D., Sioux Falls Arpt: (a) Change procedure turn min. alts to: 10 mi.-2700', 15 mi.-2700', 20 mi.-2900', 25 mi.-2900'; (b) Change min. alt over range on final approach to 2200'; (c) Straight-in approach not authorized (NA) day or night; (d) Change remarks column to: Climb to 3000' on NE leg within 25 mi.

(13) TALLAHASSEE, FLA., Dale Mabry Field: Add min. initial approach alt from: NW-700' (Quincy FM)(Final).

(14) WEST PALM BEACH, FLA., Palm Beach International Airport: (a) Change min. initial approach alts from N to: 1600' (SE leg Melbourne); from S to: 1400' (Miami Range); (b) Add min initial approach alt from: S-1200' (Ft. Lauderdale FM); (c) Change remarks cclumn to: Climb to 1200' on E leg.

(B) Instrument Approach Procedures-Instrument Landing Systems:

(1) CHEYENNE, WYO.: Under "Transition to ILS", correct distance from Cheyenne range to outer marker to 8.4 mi.

(2) ATLANTA, GA.: Correct distance from middle marker to approach end of rnwy to 0.70 mi. Under "Transition to ILS", change distance from Int Atlanta Rng and SE leg ILS to the outer mrkr to 2.4 mi and the min alt to 2000'. Change min alt from Jonesboro FM to SE leg ILS to 2000'. Change procedure turn min alt to 2000'. Change min alt at glide path interception to 2000'. Change glide path alt over middle marker to 1200'.

(3) CHARLESTON, S.C., Charleston Arpt: (a) Under "Transition to ILS", change mag course from Int E leg Charleston and ILS lclzr to the outer marker to 328° and the distance to 5.6 mi. Delete transition from Charleston Rng to NW leg ILS.

(4) LOS ANGELES, CALIF., Los Angeles Arpt: (a) Change procedure turn min alt to 2000' (b) Add to remarks column: In no case make procedure turn farther E than Downey FM

(5) WICHITA, KANS., Wichita Arpt: (a) Under "Transition to ILS", change mag course and distances to the following: From Wichita Range to S leg ILS - 167°, 2.2 mi.; from Viola FM to S leg ILS - 73°, 18.5 mi.; from Oxford FM to S leg ILS - 337°, 16.2 mi.

(C) Instrument Approach Procedures-D.F. Procedures:

(1) IOWA CITY, IOWA, Iowa City Arpt: (a) Add the following initial approach to D/F sta: From Int. N leg Burlington and 271° bearing on H to H is 271°, 24.0 mi. and min alt of 2000'; (b) Procedure turn min alt is 1900' for all given distances; (c) Regular day minimums should be 800', 1.5 mi.

(2) QUINCY, ILL., Quincy Arpt: Under "Initial Approach to D/F Sta", change mag course from St. Louis Range to H to 325°.

AMENDMENTS TO PUBLISHED MINIMUM ENROUTE INSTRUMENT ALTITUDES:

Correct Minimum Enroute Altitudes, carried in the Flight Information Manual Supplement, dated April 15, 1948:

✓ AERONAUTICAL CHART AND PUBLICATIONS CORRECTIONS: (1) Correct Winston Salem Sectional Aeronautical Chart, dated April 21, 1948, by changing ident and code from

CHW - . - . . . . . . - - to HI . . . . . . on the Huntington, W. Va. radio range.

(2) Correct Winston Salem Sectional Aeronautical Chart, dated April 21, 1948, by changing the ident and code from KN - . - - . to CHW - . - . . . . . . - - on the Charleston, W. Va. radio range station.

(3) Correct Coast and Geodetic Radio Facility Charts as follows:

(a) RF Chart 28, dated May 26, 1948, Wichita, Kans. twr transmits and guards 119.5 mc. Delete transmits and guards 118.7 mc.

(b) RF Chart 25A, dated April 7, 1948, Chatsworth, Calif., non-directional radio beacon ident "CSW" and Burbank control tower transmitting and receiving on 118.7 mc.

(c) RF Chart 21A, Philadelphia, Pa. ground control corrected to read: 121.9 mc.

(d) RF Chart 33, dated May 19, 1948, Abilene, Tex. control tower transmitting and receiving on 119.1 mc instead of 118.7 mc.

(4) Correct Coast and Geodetic Survey Instrument Approach Chart (ILS 453), by showing Wichita, Kans. tower transmitting on 119.5 mc.

(5) Correct C & G S IAC (301), dated May 7, 1948, by listing Will Rogers Tower VHF freq. 118.3 mc instead of 118.7 mc.

(6) Correct C & G S I.A. & L. Chart (AL 67), dated April 2, 1948, by showing Rnwy 1[illegible] as 6000'. Chatsworth non-directional radiobeacon ident "CSW". Chatsworth FM ident one dot four dashes.

(7) Correct C & G S Instrument Approach Chart No. 369, dated April 22, 1948, by Showing San Antonio ILS missed approach: climb to 2500' on NE course of ILS.

(8) Correct C & G S RF Chart 28, dated May 26, 1948 by reversing "A" and "N" quadrants covering E leg of Amarillo Range.

✓ NON-STANDARD HOLDING PATTERNS: The following non-standard holding patterns are utilized in the respective control areas shown below:

(1) Albuquerque Control Area: Albuquerque Range-Hold on the S course Albuquerque between the sta and point 4 min S, make all turns to the W; Peralta Marker-Hold on the S course of Albuquerque between Peralta Mrkr and point 2 min S, make all turns to the W. Trinidad Range-Hold on N course of Trinidad between stn and point 4 mins N, make all turns to the E; Conway Intxn-Hold on E course of Amarillo between Conway Intxn and point 4 mins E, make all turns to the S.

(2) El Paso Control Area: El Paso Range-Hold on E course of El Paso between stn and point 4 mins E. Make all turns on S side of E course; Hueco Mtn FM-Hold on E course of El Paso between Hueco Mrkr and point 2 mins E. Make all turns on S side of E course of El Paso; Newman MHW facs-Hold on N course of El Paso between Newman fac and point 2 mins N. Make all turns to E side of N leg of El Paso Range.

(3) Fort Worth Control Area: Lipan Intxn (W course of Dallas, NW course of Waco)-Hold on W course of Dallas between the intxn and point 4 mins E. All turns to be made in SW quadrant of Dallas Range.

(4) San Antonio Control Area: Webster FM-Hold on SE course of Houston rng stn between Webster FM and point 2 mins SE. Make all turns to the W; Houston Range-Hold between range and point 4 mins SE. Make all turns to the W.

✓ AIR ROUTE TRAFFIC CONTROL AREA BOUNDARY CHANGE: In the near future the boundary between the New York and Washington Ctrs will be changed from 25 mi SW of Philadelphia (International) range to the intxn of the SW course of Philadelphia (International) range and the W course of New Castle.

METEOROLOGICAL SERVICES AVAILABLE TO CIVIL PILOTS: Weather forecasting and reporting services for civil aviation are provided by the United States Weather Bureau of the Department of Commerce. Observations and reports are made at hourly intervals at approximately 500 stations and special reports are made for sudden changes in weather conditions.

The stations from which forecasts and reports may be obtained fall in three categories as follows:

Airway Forecast Centers: At these 18 offices forecasters are on duty 24 hours of every day to provide forecasts, information, and advice concerning aviation weather.

Albuquerque, N.M.	Denver, Colo.	Minneapolis, Minn.
Atlanta, Ga.	Ft. Worth, Tex.	New Orleans, La.
Billings, Mont.	Kansas City, Mo.	Salt Lake City, Utah
Boston, Mass.	LaGuardia Field, N.Y.	San Francisco, Calif.
Chicago, Ill.	Los Angeles, Calif.	Seattle, Wash.
Dayton, Ohio	Miami, Fla.	Washington, D.C.

Flight Advisory Weather Service Units: These offices are located in the 26 CAA Airway Traffic Control Centers and are staffed 24 hours a day to give short range detailed information and advice. The weather service available from FAWS should be particularly helpful to pilots in the air, who can obtain it by calling any Airway Communications Station by radio.

Weather Bureau Airport Stations and Airway Communications Stations; Most of these stations are open 24 hours a day, and weather reports, regional forecasts and terminal forecasts as distributed by teletype may be obtained from them. In many cases, however, professional forecasters aren't on duty throughout the 24 hours at these stations and requests for specific trip forecasts must be made a sufficient time in advance to permit obtaining the information from the appropriate forecast center. Where full meteorological service is required, at least two hours' notice (in addition to communication time) should be given for a flight exceeding 500 miles from point of departure to point of first landing, and at least one hour's notice for flights not exceeding 500 miles.

Requests for trip forecasts should include details of the route to be followed, time of departure, estimated time of arrival, air speed and type of aircraft, flight altitude and whether flights will be made VFR or IFR.

The attention of all pilots is also directed to the fact that weather reports and other information are broadcast at 15 and 45 minutes past the hour from all continuously operated CAA radio range stations. A listing of the commercial weather broadcasts may be obtained by writing to the Chief, U.S. Weather Bureau, Washington 25, D. C.

TELETYPE NOTAMS: Throughout the year climatic conditions (snow storms, floods, etc.) render many fields temporarily unusable or unsafe. In addition, there are intermittent maintenance operations in progress on many fields. Radio facilities suffer temporary power failures or course misalignments, and lighting facilities are temporarily inoperative. Because these temporary conditions cannot be given immediate coverage in the "Airman's Guide, full cognizance must be taken of Teletype Notam service which gives the desired coverage on any facility or field at which teletype transmitting stations are based. Cross-country pilots, accordingly, should consult these Teletype Notams for latest available data on air navigation aids. These teletype notams are posted in CAA Communications Stations and in all Air Force Field and Naval Air Station Operations Offices having teletype drops.

AIRPORT AND RADIO NOTICES

LEGEND

* - New or revised airport, danger area, or miscellaneous data to be inscribed on charts or added to records.

★ - New or revised radio data to be inscribed on charts or added to records.

LYNCHBURG-PRESTON GLENN ARPT: Use rnwys when wet. (2-25)
NORFOLK NAS-EAST FLD: Pilots inbound IFR to NAS Norfolk from any direction other than via Green 6 obtain specific ATC instructions for flgt within Norfolk Control area (25 mi radius) prior to entering this area. The aforementioned specific ATC instructions may be obtained from Chincoteague Rdo or Twr (0700-2400), Patuxent Rdo or Twr, Richmond Rdo, Weeksville Rdo (0700-1900), Elizabeth City Coast Guard Twr (0700-1900), Langley Rdo or Twr, Navy Norfolk Rdo or Twr, Norfolk Rdo or Twr. Tetrahedron lgtd but uncontrollable. Equip. on fld. (6-17)
OCEANA NAAS: Facs avail. 0800 to 1630 Mon thru Fri. Ltd facs 1630 to sunset Mon thru Fri, 0800 to sunset Sat, Sun and holidays for essential mil flgts only. After sunset emerg landings only. Lgts under const-unreliable. Soft shoulders and trenches along sides of rnwys, taxi strips. Equip. on fld. (9-30)
QUANTICO MCAS-RADIO: Navy rng and bdcast fac inop. (5-15) FLD: Const in progress. (5-17)
RICHMOND: Elko Aux Fld, 5 mi E of Byrd Fld is similar in design and layout to Byrd Fld, BUT RNWYS ARE UNSUITABLE FOR LANDING BY ACFT OF ANY TYPE. Care should be taken not to confuse the two flds.
RICHMOND-HERMITAGE ARPT: CLOSED. (5-12)
RICHMOND-PARNELL ARPT: Const S end N/S strip, mrkd. NNW/SSE rnwy unusable, soft. (4-5)
SHENANDOAH ARPT: Const equip. on fld. (10-16)
WASHINGTON: BELLEVUE-LAKE ARPK: First turn at 600' Take-offs to SSW. (1-5)
★BELLINGHAM-RADIO: VHF omnirng placed in oper on unmonitored test basis June 18. Freq. 115.7 mc, ident. "BLI". Stn lctn: lat 48-48-24, long. 122-36-39. Not flgt-checked, not to be used for navigation. Var. 24° E. Elev. 25' MSL. Class: VORW.
BELLINGHAM ARPT: Do not taxi off surfaced areas-sodded portions soft. Pilots of all unscheduled acft must register at the CAA Communs Bldg. Pilots of all scheduled acft using Bellingham Arpt as an alternate landing fld must register also. (2-3)
BREMERTON-KITSAP CO. ARPT: Holes S half NE/SW rnwy. Do not taxi off surfaced areas-sodded areas soft. (4-23)
BREWSTER-RIVERVIEW ARPT: Right traffic on ENE take-offs and landings. (3-25)
BUENA ARPT: Right traffic E take-offs and landings. (3-25)

[redacted]: CLE ELUM ARPT: Right traffic E take-offs and landings. Stay S of fld at all times. (3-25)
COLLEGE PLACE-MARTIN FLD: Main rnwy under const. Use sod strip on S. (4-12)
★ELLENSBURG-RADIO: June 10, VHF omnirng placed in oper on unmonitored test basis, fac not figt-checked, not to be used for navigation. Freq. 114.7 mc, ident. "ELN". Stn lctn: lat 47-01-11, long. 120-27-24. Elev 1769' MSL. Var. 22° E. Class: VORW.
EVERETT-PAINE FLD: Hangar under const S of parking area 500' W of present hangar, mrkd with red flags and lanterns. Ctn when taxiing this area. (4-19)
FORKS ARPT: Right traffic take-offs and landings to WSW. (4-6)
GRAHAM-PUYALLUP ARPT: Right traffic N take-offs and landings. (3-25)
ISSAQUAH-SEATTLE SKY RANCH: Enter and leave traffic pattern NW of fld. (1-5)
KELSO ARPT: Seepage SW end of fld. (6-17)
MALOTT ARPT: Right traffic on E and ENE take-offs and landings. (3-25)
McCHORD AFB (TACOMA): Obst lgts on 2 antennas 5809' S of Rnwy 34, 1388' right of center line inop. (2-26)
METALINE FALLS-SULLIVAN LAKE ARPT: Before landing trans circle U.S.F.S. bldgs (adj to arpt) in effort to have vehicular traffic across landing strip temp stopped. (3-25)
MOUNT CATHERINE BCN SITE 4, SEA-HLN: Bcn inop. (5-10)
MOUNT VERNON OLF: Closed to all acft except those permitted by the C.O. NAS Whidbey Island. Training use rqrs 24 hrs advance notice thru Whidbey Island NAS. Bcn inop.(10-31)
OPPORTUNITY-LEMEN ARPK: Right traffic NE take-offs and landings. (3-25)
OROVILLE-DOROTHY SCOTT ARPT: Right traffic S take-offs and landings. (3-25)
★FORT ANGELES CGAS-RADIO: Coast Guard H fac in oper on 544 kc, ident. "NOW", "Z" mrkr at E end of rnwy. Operates on req only. Class: HW Twr transmits on 2704 kc, 142.74 mc. Grds 3105 kc, 142.74 mc. Oper: 0800-1600 Mon-Fri and on req. Radio Air/grnd call: "NOW". Transmits on and grds 2670,500 kc cont, 4050 kc, 143.28 mc on req.
**PORT ANGELES CGAS SEAPLANE BASE: Svcg S4. No fuel. Mts S; smokestack S, SW. Ngt landings not recommended, floating logs.
PORT TOWNSEND-COUNTY-CITY ARPT: Right traffic E take-offs and landings. (3-25)
PULLMAN-MOSCOW ARPT: Equip. on fld. Soft spots and loose rocks on rnwys. (5-13)
PUYALLUP-S & S AIRSTRIP: Right traffic S take-offs and landings. (3-25)
REPUBLIC-FAIRWEATHER FLD: Right traffic NNW landings. All take-offs to SSE. (3-25)
RITZVILLE ARPT: NE end strip under const, mrkd. (5-12)
SEATTLE: Captive balloon oper for fog research from the N shore of Portage Bay, Seattle approx midway between Lake Union and Lake Washington along ship canal. Balloon is 6' in diameter unmrkd and unlgtd with an instrument weighing approx 1-1/2 lbs suspended below and secured to launching reel. Balloon released to various alts up to 2000' any time day or ngt during formation and dissipation of fog in this area. (2-20)
SEATTLE-BELLEVUE AIRFLD: Right traffic when landing to S. (3-25)
SEATTLE-BOEING FLD: All daylgt VFR opers of lgt acft confined to lgt plane strip E of main rnwy. Traffic patterns to the E at 1000'. Right traffic when taking off to NW. Flash. amber lgt on twr indicates right traffic for lgt acft. Left traffic when taking off from lgt plane strip to SE. All turns when taxiing off lgt plane strip made toward twr. Pilots using lgt plane strip avoid flying over main rnwy or approaches thereto. Lgt gun signals issued on final approach. Hvy acft use main rnwys, taxi strips only, making traffic pattern W of fld at 1000'. Avoid flagged area E side of strip. Equip. on fld. (6-11)
SEATTLE NAS: Single-engine acft approach from Kirkland 1500' descending to 1000' over the stn. Rnwy 14-32 lgtd 30 mins prior to arvls and dptrs between sunset and sunrise and on req. (2-20)
SEATTLE-TACOMA ARPT: 2-way rdo rqrd for practice landings. Equip. on fld. (8-28)
★SPOKANE-RADIO: Auto. rng monitor. sys comm June 15.
SPOKANE-FELTS FLD: Lgt non-rdo-equipped acft use mrkd graded area S of main rnwy. Fancher Bcn near Felts Fld inop. Take-off and land on sod area before reaching taxiway near center of fld. N side rnwy mrkd. Red flag displayed from twr days and flash. red lgt atop twr ngts indicates weather below VFR minimums. Use concrete rnwy only. (5-24)
SPOKANE-GEIGER FLD: Acft other than scheduled air carriers ctc Felts Twr for wind direction, velocity and rnwy in use before landing. Closed to acft not equipped with properly functioning two-way rdo capable of communs with Felts Twr. Rnwys 16,20,25 counter-clockwise traffic. Rnwys 2,7,34 clockwise traffic. All take-offs and landings made on rnwy most nearly aligned with free swinging wind indicator except calm wind Rnwy 34 which will be used when wind velocities are less than 6 MPH. (6-15) Filled ditch off E end E/W rnwy soft. Obst lgts on top of flood lgts E end E/W rnwy inop. Glide path mast extending 30' above grnd, lgtd. Lctd 400' NW of NE/SW rnwy and 400' N of E/W rnwy. (6-18)

[redacted]: TACOMA-BARRY'S SKYHARBOR ARPT: Right traffic W take-offs and landings. (3-25)
TACOMA-CITY VIEW ARPK: CLOSED (const). (4-27)
TONASKET ARPT: Right traffic S landings and SSE take-offs and landings. (2-4)
VANCOUVER MUN ARPT: CLOSED. (5-30)
VANCOUVER-PEARSON ARPK: ESE/WNW strip under const. (4-8)
[redacted]: CHARLESTON-BOLLINGER FLD: Lgts on 240' twr Rdo Stn WKNA 5 mi N inop. (1-23)
CHARLESTON-KANAWHA CO. ARPT: Equip. on fld days. (3-22)
CLARKSBURG-PATTON FLD: Right traffic on landings to the S. (8-5)
ELKINS-RADIO: Petersburg FM, lctd 44 mi E on the E course has been placed in oper on test basis, not to be used for navigation. Ident. one dash. (5-29)
SPENCER-ROANE CO. ARPT: CLOSED (const). (6-10)
WHEELING-OHIO CO. ARPT: Const N side W end E/W rnwy, mrkd. Equip. on fld days. (4-26)
[redacted]: BARABOO-BELL AERO SERVICE ARPT: Soft when wet. (3-24)
BROWN DEER ARPT: Soft when wet. (5-24)
BUTLER-CURTISS-WRIGHT ARPT: Closed ngts. (3-24)
EAU CLAIRE ARPT: Equip. on fld. Use rnwys only except in strong cross winds. (5-11)
GREEN BAY-NICOLET ARPT: Use strips only. (6-8)
★LONE ROCK-RADIO: VHF omnirng placed in oper on unmonitored test basis. Freq. 113.6 mc. Stn lctn: lat 43-17-40, long. 90-07-50. Elev 1158' MSL. Var. 4° E. Class: VORW. Disregard spurious signals being emitted. (6-18)
MADISON-RADIO: Tune-up of VHF omnirng will begin soon on 112.2 mc. Lat 43-07-32, long. 89-15-20. Elev 1062' MSL. Spurious signals should be ignored. (6-17)
MADISON ARPT: Equip. on fld days. (1-14)
MILWAUKEE-RADIO: Soon, VHF omnirng will be placed in oper on unattended, unmonitored test basis. Freq. 115.1 mc, ident. "MKE". Stn lctn: lat 42-52-10, long. 87-54-36. Elev. 700' MSL. . Var. 2° E. Associated INSAC is Milwaukee, Wis. Class: VORW.
MILWAUKEE-GENERAL MITCHELL FLD: Equip. on fld days. Right turn procedure rstd to locally based acft. New NNE/SSW rnwy 1-19 open days. Army twr lctd W side fld closed and should not to confused with CAA twr lctd N side fld. N/S cinder strip avail. lgt acft only. (4-15)
WAUKESHA CO. ARPT: Make first turns to left after landing and taxi on right side of strips to parking areas. Avoid landing or taxiing on soft area W side of N/S rnwy. (5-24)
[redacted]: CASPER AFB: All rnwys unmrkd. (2-4)
CASPER-WARDWELL FLD: Use rnwys, taxi strips only, bal fld rough. 40' unlgtd pole erected at 30 million candle pwr ceilometer projector 1000' N of hangar. (2-17)
CHEYENNE ARPT: Equip. on fld. Use rnwys, taxi strips during wet weather-shoulders soft. (2-20)
KEMMERER INT FLD: About July 1, will be converted to a type PD Arpt. Oper and maintenance of fld and lighting facs will be assumed by the City of Kemmerer. (6-18)
LARAMIE-BREES FLD: Sod taxi strip running S from hangars closed. (4-22)
SHERIDAN CO. ARPT: N/S rnwy unsafe hvy acft. Taxi strips parallel all rnwys except N/S rnwy and terminate at ramp. Equip. on fld intermittently. (2-23)
SINCLAIR-RADIO: About June 29, E course of LF rng will be realigned to 254°. LF rng freq will be changed to 368 kc. Stn class will be: SBRAZ-DTV. Pwr increased to 400 watts. (6-11)
★ROCK SPRINGS ARPT.-RADIO: Middle compass lctr comm at middle mrkr site of CAA ILS on June 18. See ILS page.

(6-22-48)

ATOMIC ENERGY AIRSPACE

SPECIAL NOTICE

AIRSPACE RESERVATIONS: Airspace reservations were established by Presidential Executive Order 9925, dated January 17, 1948, over Atomic Energy installations at Oak Ridge, Tenn.; Richland, Wash.; and Santa Fe, N. Mexico.

These airspace reservations are prohibited areas within which no aircraft shall be flown except by authority of the U.S. Atomic Energy Commission.

These prohibited areas are now prominently displayed on the current pertinent aeronautical charts. Furthermore, a chart depicting these three prohibited areas as well as the Salton Sea, Calif., Denver Area has been sent to all airport managers for posting on airport bulletin boards.

Since there is no further excuse for ignorance on the part of pilots or navigators, future violators of the aforesaid Executive Order shall be subject to the penalties covered in the Air Commerce Act of 1926, the Civil Aeronautics Act of 1938, and applicable military regulations.

U. S. U. LIBRARY
JUL 16 1948

The three Prohibited Areas are described below:

(1) Oak Ridge, Tenn. - An asymmetrical pentagonal area, with its axis running northeast/southwest, about 10 miles west of Knoxville, Tenn., beginning at lat 36-00-25, long 84-07-05; thence to lat 35-52-10, long 84-24-15; thence to lat 35-51-35, long 84-16-25; thence to lat 35-52-10, long 84-13-30; thence to lat 35-55-45, long 84-29-30; thence to lat 36-05-05, long 84-13-30; thence to lat 36-00-25, long 84-07-05, the point of beginning.

(2) Los Alamos, N.Mex. - A roughly quadrilateral area about 16 miles northwest of Santa Fe, N. Mex., beginning at lat 36-00-00, long 106-04-00; thence along the Rio Grande River to lat 35-45-00, long 106-15-00; thence to lat 36-00-00, long 106-04-00; thence to lat 35-45-00, long 106-30-00; thence to lat 36-00-00, long 106-30-00; thence to lat 36-00-00, the point of beginning.

(3) Richland, Wash. - An asymmetrical heptagonal area about 35 miles east of Yakima, Wash., beginning at lat 46-33-40, long 119-13-00; thence to lat 46-20-00, long 119-13-13; thence to lat 46-18-06, long 119-30-00; thence to lat 46-26-00, long 119-47-25; thence to lat 46-40-45, long 119-47-28; thence to lat 46-46-50, long 119-33-35; thence to lat 46-46-50, long 119-28-16; thence to lat 46-33-40, long 119-13-00, the point of beginning.

CIVIL AERONAUTICS ADMINISTRATION
OFFICE OF AVIATION INFORMATION

GCA AVAILABLE: How and Where

GROUND CONTROLLED APPROACH (GCA) AVAILABLE TO CIVIL PILOTS AS WELL AS ARMY AND NAVY. All GCA facilities (Air Force, Navy, or CAA) are available to any plane in emergency. To secure GCA assistance, pilots should first call the associated control tower.

In addition to the working frequencies listed below, Air Force and Navy GCA emergency VHF transmissions are made on 140.58 mcs. Simplex service on 3117.5 kcs will be provided at all Air Force and Navy installations to provide an alternate means of communications for scheduled air carrier aircraft. Army towers will relay GCA instructions on 200-400 kcs band to civil aircraft not equipped to receive VHF or HF. Most Navy and CAA GCA units can transmit instructions directly on tower low frequency. No AF units can transmit directly on tower low frequency. Those installations not suffixed by (&) can relay directions on tower low frequency.

A minimum of 30 minutes will generally be required to assemble a GCA crew and prepare the equipment for operation AFTER an alert has been received at those locations not providing continuous service. CAA GCA units, however, operate continuously. Pilots desirous of making practice GCA approaches should make their own arrangements with the tower concerned.

N.B. AF and Navy facilities are available to civil aircraft in emergency or by prior arrangement with the C.O. of the respective AFB, NAS or MCAS. Civil minimums established by the CAA are 400' ceiling and 1 mile visibility except in emergency

(7-6-48)

(A) = Air Force Facility. G.P. = Glide Path. (L6) = High Intensity Lights. (W) = Without Voice. (&) = On test basis, unmonitored and not to be used for navigation.
MMK's, OMK's are at the same locations as the middle and outer markers unless otherwise specified.

TRANSMITTING FREQUENCIES AND IDENTIFIERS

It must be remembered that practically all VHF omni-directional ranges (VOR) have not yet been formally commissioned and a great number of the VHF visual-aural ranges (VAR) are in the same status, being on test basis and not to be used for navigation. These on-test basis VHF ranges are indicated by a prefixed asterisk (*) in the following tabulation. (See Page IX for additional facilities)

LEGEND: * = Test basis-not to be used for navigation. (U) = Unmonitored, but usable for navigation
R = Low frequency range. VAR = VHF visual-aural range. VOR = VHF omni range.
H = Non-directional Radio Beacon (homing). T = Tower.
- = Voice on 111.1 but not on 116.1 mc. + = voice on 111.1 and 116.1 mc.
T(g) = Tower equipped with 121.9 or 121.7 mc transmitter for control of ground traffic.

VAR Monitoring Classification for Air Traffic Control Purposes: Category I = Following conditions must be met: (A) The visual course alignment and signal level are monitored continuously. (B) The aural "A" or "N" sector signal is monitored continuously by the communicator at the associated INSAC. (C) The station identification is monitored continuously by the communicator at the associated INSAC. (D) The aural course alignment is monitored at least once each hour by the communicator at the associated INSAC. N.B. Category I indicated by parenthetical (1). Category II = If all except (D) of the conditions of Category I are met. N.B. Category II indicated by parenthetical (2). Category III - If facility monitored solely through use of an automatic visual course monitor and automatic transfer unit. Normally, VAR's which are not controlled by an INSAC and located too distant from INSAC to be monitored with a VHF receiver will fall into Category III. N.B. Category III indicated by parenthetical (3).

DIRECTORY OF AIRPORTS

LEGEND

CITY AND AIRPORT NAME

(When city and airport names are identical, the airport name is omitted in the interest of space-conservation)

(A) Airport name* (with A in Type column) - Owned or leased totally by U.S. Air Force

(N) " (with N in Type column) - Owned or leased totally by Navy

(CG) " (with CG in Type column) - Owned or leased totally by Coast Guard

(NG) " (with NG in Type column) - Owned or leased totally by National Guard

(A) Airport name - Open to civilians but owned or leased wholly or in part by U.S. Air Force, Air Reserve, U.S. Air Force servicing detachment or contract gas usually available.

(N) " - Open to civilians but owned or leased wholly or in part by Navy

(CG) " - Open to civilians but owned or leased wholly or in part by Coast Guard.

(NG) " - Open to civilians but owned or leased wholly or in part by Army or State Government for Air National Guard. Limited servicing and maintenance for transient military aircraft.

(M) " - Civil airport open to military aircraft. (See Note 2).

• " - C.A.A. Intermediate Field.

* Air Force and Navy fields are listed alphabetically by airport name followed by city name in parenthesis.

N.B. ALL AIRPORTS EXCEPT THOSE CITED WITH AN "A" or an "N" IN THE TYPE COLUMN ARE OPEN TO CIVIL FLIERS. AIRPORTS WITH NO PREFIX ARE EXCLUSIVELY CIVIL AIRPORTS.

TYPE

A - U.S. Air Force; I - Intermediate; NG - National Guard
C - Commercial; M - Municipal
CG - Coast Guard; N - Navy; P - Private

LOCATION

The word "miles" has been eliminated because of space limitations. Mileage is that from the center of city to airport.

If orientation features are less than 1/2 mile from the field, distance is not specified.

CLASS

(Sea Level Runway and Strip Requirements)

Class	Strip Length Less than 1000'	Runway (Paved) Length Less than 1000'
1	1800-2699'	1800-2499'
2	2700-3699'	2500-3499'
3	3700-4699'	3500-4499'
4	4700-5699'	4500-5499'
5	5700-6699'	5500-6499'
6	6700-7699'	6500-7499'
7	7700-8699'	7500-8499'
8	8700-9699'	8500-9499'
9	9700' +	9500' +

N.B. Length (of longest runway) minus one-quarter of airport elevation equals effective sea level length.

RUNWAYS

In "longest" column is stated length of longest landing area in hundreds of feet.

"h" indicates landing area is hard-surfaced or paved.

"aw" indicates allway field.

No differentiation is made between runways and strips as far as number of landing areas in field is concerned.

FACILITIES AND SERVICING

RADIO

R1: Control tower voice
R2: Range (or H facility) with voice
R3: Range (or H facility) and tower
R4: Range (or H facility), tower, and ILS

LIGHTS

L: Incomplete lighting, such as flood or strip lights, which are generally available only on prior request
L1: Beacon only
L2: Beacon and boundary
L3: Beacon, boundary, and obstruction
L4: Beacon, boundary, obstruction, and flood
L5: Beacon, boundary, obstruction, flood, and runway
(L5): Identical to L5 except that runway lights are high intensity
L6: Beacon, boundary, obstruction, flood, runway, and instrument approach
(L6): Identical to L6 except that instrument approach lights are high intensity

(The class always indicates the highest element available but does not necessarily include all intermediate elements)

SERVICING

S1: Fuel (Any S combination in parenthesis indicates only part time or irregular attendant)
S2: Fuel, storage
S3: Fuel, storage, minor aircraft repairs
S4: Fuel, storage, minor aircraft, and minor engine repairs
S5: Fuel, storage, major aircraft, and minor engine repairs
S6: Fuel, storage, major aircraft, and major engine repairs

REMARKS

(a) "91 oct." indicates fuel octanes available. "AF", or "Navy", preceding octane indicates USAF or Navy contract fuel available.

(b) "CLOSED" indicates closed to all civil aircraft and all transient military aircraft except on official business with written orders this station or in emergency. "CLOSED MIL" and "CLOSED NAVY" on civil fields indicate same restrictions as above are applicable to armed services.

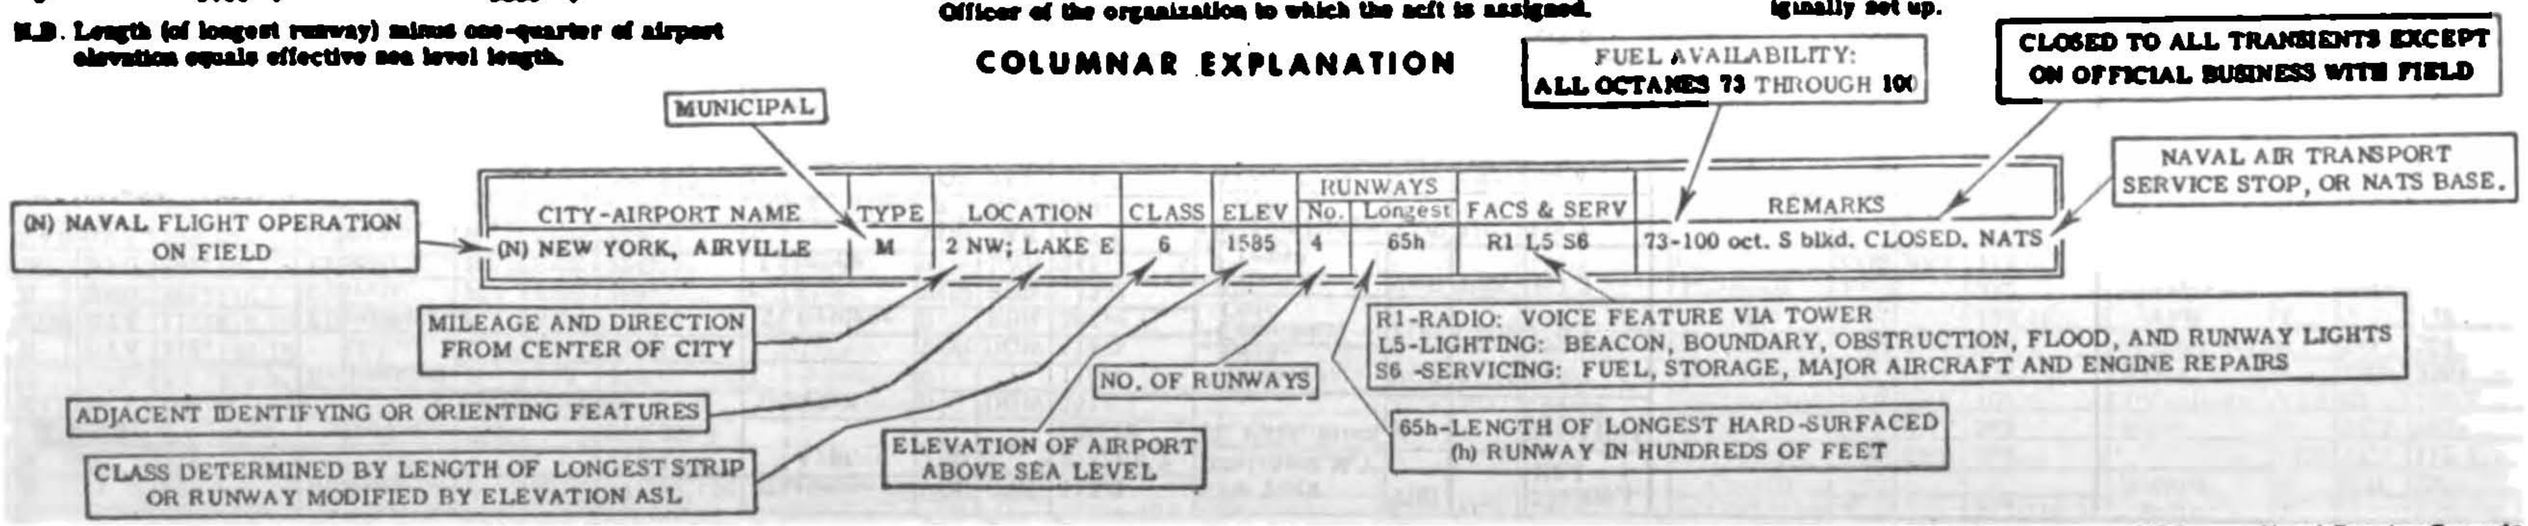
(c) "Port. B-2 lgts" indicates cone-mounted lights outlining runways. These lights are portable and may be shifted from runway to runway, or strips.

(d) "INACT-NO FACS." indicates USAF and/ or Navy airfields used either exclusively by them or municipal airfields used jointly by them and civil interests at which both the USAF and/ or the Navy and the civil interests are inactive. Such airfields will be available to military aircraft at the discretion of the Commanding Officer of the organization to which the acft is assigned.

(e) "USAF and NAVY INACT. CIVIL FACS." indicates municipal airfields used jointly by the USAF and/ or Navy and civil interests at which the USAF, or Navy facilities are inactive but civil facilities are available. Such fields may be used by military aircraft, however, only commercial service is avail.

(f) OBSTRUCTIONS: Because of space limitations only the more dangerous obstructions are indicated. Natural obstructions, like trees, clearly discernable for contact operations, are frequently omitted, for example. On the other hand, all pole lines within at least a 15-1 glide angle are indicated.

(g) "Bcn and/or fld lgts on req" indicates lights are available only by previous phone call, telegram, or letter. It must be remembered that most fields do not have 24-hour operation. Accordingly the lights, indicated for such a lighted field, (and in some instances, even the rotating beacons) are available only by prior request. When an airport classification indicates a lighted field, and there is no notation in the REMARKS column, the lights burn all night or will be turned on when a radio request is made or a plane circles the field.



(h) "FEE" indicates landing charges for revenue producing aircraft.

NOTES

1. ← Notam data revising previous issues.
2. "(P)" in City and Airport Name column indicates: (1) those municipal airports improved with public funds and covered by an agreement between the municipality and the U.S. Government permitting government planes to use such fields in common with others and without charge, to the extent possible without restriction of non-military operations, or (2) other civil airports for which legal permits covering their limited use by military aircraft have been procured and filed with the real estate agency of the Department of the Army.
3. "*Effingham, 10, LS-D" in City and Airport Name column indicates that the airport is Effingham CAA Intermediate Field, Site 10 on the St. Louis-Indianapolis Airway. Municipal airports where the lights are maintained by the C.A.A. are listed similarly except that there is no prefixed star.
4. AIRLINE STOP airport names are capitalized.
5. PRIVATE AIRPORTS are available for owner only, and not to be used by others except in emergency. Since no servicing is available for transients no "S" combination is ever assigned these fields.
6. "BLKD" indicates approaches where glide angle to runway is 3:1 or less.
7. "(Formerly Air Force)" or "(Formerly Navy)": These former Air Force and Navy fields are in the process of being disposed of by the War Assets Administration and Farm Credit Administration. Their type is difficult of determination currently and they should be used with caution as some, unable to be disposed of as airport property, are being diverted to agricultural purposes.

** At the end of each state, under the heading of NEW AIRPORTS, will be found, out of alphabetical alignment, all the new airports tabulated after the type for that page had been originally set up.

COLUMNAR EXPLANATION

AIRPORT NAME ABBREVIATIONS

AFB - U.S. Air Force Base
CGAS - Coast Guard Air Station
LTA - Lighter than Air
MCAS - Marine Corps Air Station
MCAAF - Marine Corps Aux. Air Facility
NAAS - Naval Aux. Air Station
NAF - Naval Air Facility
NAS - Naval Air Station
NPG - Naval Proving Grounds
OLF - Outlying Field (Navy)

(7-6-48)

NOTICES TO AIRMEN

AIR FORCES SPECIAL NOTICES

AIR FORCE DATA: Advice covering Air Force fields or Air Force operations on civil fields, or Air Force radio facilities, and also Air National Guard fields and facilities should be forwarded to Commanding General, Air Transport Command, Attention: Flight Operations Division, A-3. Requests for approval of the closing of Air Force airfields or restrictions in airfield facilities to transient military aircraft for over 10 days should be forwarded to the same address for submittal to Chief of Staff, USAF, as required. Restrictions in Air National Guard Fields or facilities will be forwarded to the National Guard Bureau through the State Adjutant General for approval. That Bureau will forward approved restrictions to the above address for publishing. Information to be published will be coordinated and submitted to the Civil Aeronautics Administration.

In connection with the above the attention of all base operations officers is invited to AF Regulation 55-12 of February 20, 1948, subject, "Notices to Airmen", and to AF Regulation 5-16 of February 20, 1948, subject, "Responsibilities for Flight Publications"

AIR FORCE OFFICIAL BUSINESS: Air Force official business within the meaning of AF Regulation 85-2 is interpreted as the necessity for personnel aboard an aircraft to contact personnel, units, or organizations at or near the airfield selected for landing for the purpose of conducting transactions in the service of, and in the interest of, the United States Government. This does not include the use of an airfield by transient aircraft for the purpose of obtaining clearance, service, or other items attendant with itinerant operations. Cross country flights for the purpose of maintaining flying proficiency are not considered to be official business within the meaning of this regulation.

AIR FORCE FOREIGN CLEARING STATIONS: Under the authority of AF Regulation 60-8 of August 28, 1947, U.S.A.F. aircraft with destinations listed below or returning therefrom to the United States will clear through the stations indicated: AFRICA & AZORES - Brookley AFB, Ala., MacDill AFB, Fla., Washington National Airport, D.C., or Westover AFB, Mass. ALASKA - McChord AFB, Wash., or Great Falls AFB, Mont. BERMUDA - Mitchel AFB, N.Y., Brookley AFB, Ala., MacDill AFB, Fla., Washington National Airport, D.C., or Westover AFB, Mass., or Fairfield-Suisun AFB, Calif. CANADA - Great Falls AFB, Mont., Brookley AFB, Ala., McChord AFB, Wash., Washington National Airport, D.C., Selfridge AFB, Mich., or Westover AFB, Mass. CANAL ZONE, CENTRAL AMERICA, MEXICO, & SOUTH AMERICA - March AFB, Calif., MacDill AFB, Fla., Kelly AFB, Tex., or Brookley AFB, Ala. CARIBBEAN - Brookley AFB, Ala., Kelly AFB, Tex., or MacDill AFB, Fla. ENGLAND, GREENLAND, ICELAND, & NORTH IRELAND Washington National Airport, D.C., or Westover AFB, Mass. NOVA SCOTIA & NEWFOUNDLAND - Washington National Airport, D.C., Westover AFB, Mass., Selfridge AFB, Mich., or Brookley AFB, Ala. HAWAII - Fairfield-Suisun AFB, Calif. EUROPEAN THEATER - Brookley AFB, Ala., MacDill AFB, Fla., Washington National Airport, D.C., or Westover AFB, Mass.

V.H.F. CHANNEL ASSIGNMENTS: Following are USAF assignments:

CHANNEL	AF FREQUENCY	CHANNEL	AF FREQUENCY
A	116.1	H	134.10
B	126.18	U	108.3
C	137.88	V	108.7
D	140.58	W	109.1
G	137.70		

MINIMUM SAFE ALTITUDES ON AIRWAYS: Under USAF Regulation 60-16 and policy of USAF, minimum safe altitudes for flight along airways will be identical to those established by the Civil Aeronautics Administration. Action is being taken to amend pertinent USAF flight information publications to show these minimums.

✓ Indicates new or revised Special Notices

SPECIAL NOTICES

IFR CLEARANCE MINIMUMS FOR CIVIL FIELDS: For IFR clearance to civil fields when minimum altitude over field is not shown on let-down chart contained in T.O. 08-15-3, or Pilots Handbook, USAF policy states that the "REGULAR - DAY" minimum as shown in CAA Flight Information Manual will apply. Necessary action is being taken to amend all charts to show the proper minimums.

OFFICIAL AIR FORCE FIELD DESIGNATIONS: The official names and designations of Air Force Fields have been changed to new designations by the Department of the Air Force General Orders No. 2 of January 13, 1948. The abbreviation "AF Aux." stands for Air Force Auxiliary Field and the abbreviation "AFB" is for Air Force Base.

✓ **POLICY ON CONTROL TOWER PROCEDURE:** In the interest of decreasing communications load, the practice of tower traffic controller requesting information from incoming aircraft on highest rank aboard will be discontinued. This information will be included in transmission of flight plan over Plan 62 facilities. Other essential information not normally included in flight plan, such as indicating VIP's, will be noted in remarks column and similarly transmitted.

UNAUTHORIZED USE OF VHF EMERGENCY FREQUENCY (140.58 MC): The attention of all operations offices and pilots is invited to AF Letter 100-31, of January 13, 1948, subject, "Unauthorized Use of VHF Emergency Frequency (140.58 mc)".

DIRECT PILOT WEATHER FORECASTER COMMUNICATIONS SERVICE: Direct radio communication between military pilots and AWS weather forecasters is provided at locations and on frequencies given below. This service should be used only for those emergency occasions when the pilot considers direct communication with the weather forecaster is necessary for procurement of special weather data. In normal cases the weather sequences available from Airways Stations and Radio Range Stations is considered adequate.

Procedure: Establish contact with the Military Airways Station on the appropriate frequency and request connection to the weather forecaster:

Location	Frequency (VHF)
Langley Airways, Langley AFB	C
Tinker Airways, Tinker AFB	CAD
March Airways, March AFB	C

✓ **CORRECTIONS FOR AND ADDITIONS TO USAF T.O. 08-15-1:** (1) Correct page 20, ident. for Neah Bay is "NBY". Ident. of Whidbey Island BMRLZ "NUW", H facility "K".

(2) Correct Canadian Data Page 8. Greenwood, N.S. Control twr operates 0800 to 1800 daily, and on request.

(3) Correct page 10, by showing distance from Sprague ville to Presque Isle AFB as 3.6 miles. RCAF grnd/air station at Dorval Airport now operates 0700 to 2300.

(4) Correct page 50, by adding BMH facility at Valdosta on 224 kc, Channel A, guarding 3105,4495,6210,3117.5 kc., with weather broadcasts at :15 and :45.

(5) Correct page 84. Listing under "Page No." for WYF should read: 28-40.

(6) Correct page 85. Scott AFB. Listing under "Page No." should read: 28-40.

(7) Correct page 115, "List of Proper Voice Radio Procedure for Position Reporting, Change of Flight Plan and Clearance from Non-USAF Bases" by listing information under paragraph C, "Clearance from Non-Military Bases" as follows:

(1) Radio call
(2) Aircraft type
(3) Pilot's last name
(4) Point of departure
(5) Route and altitude
(6) IFR, VFR
(7) Destination
(8) True air speed
(9) Frequencies
(10) Proposed departure time
(11) Time en route
(12) Hours of fuel
(13) Alternate
(14) Ratings (Pilot and instrument)
(15) Highest rank aboard
(16) Location where crew and passenger list filed
(17) Expiration date of instrument card
(18) Pilot's home station

CORRECTIONS FOR AND ADDITIONS TO USAF T.O. 08-15-3: Correct Cheyenne chart to show minimum altitude over field as 6656'.

For additional corrections see Page 56.

NAVY SPECIAL NOTICES

NAVY DATA: In accordance with Hydrographic Office Memorandum for Aviators No.9, July 29, 1946, Hydrographic Office information concerning naval and marine corps air stations and facilities, including changes in field facilities, operation rules, air/ground communications facilities, instrument approach procedures and navigational aids, should be directed to: The Division of Air Navigation, Hydrographic Office, Washington 25, D.C., for transmittal to the C.A.A. In accordance with Aviation Circular Letter No. 96-46 of June 13, 1946, approval for the closing of any naval or marine corps air station or facility to transient military aircraft for a period in excess of 10 days must be obtained from the Chief of Naval Operations. Also, approval is to be obtained from the Chief of Naval Operations before relocation or modification of any aid to air navigation, such as reorientation of radio ranges.

V.H.F. CHANNEL ASSIGNMENTS: To standardize the frequency and channel set-ups for VHF equipment in naval aircraft, the following assignments became effective July 1, 1948 unless otherwise directed by authorized commanders:

CHANNEL	FREQ.	PURPOSE	CHANNEL	FREQ.	PURPOSE
1-A	116.1	CAA stations	5-F		Tactical
2-B	142.74	Navy Towers	6-G	143.64	GCA
3-C	137.88	USAF Airways	7-H	142.02	GCA

RESTRICTIONS ON NAVAL AIRCRAFT AT LA GUARDIA FIELD, INTERNATIONAL AIRPORT, AND NEWARK AIRPORT: La Guardia Field, N.Y., New York International Airport, N.Y., and Newark Airport, N.J., are closed to all Naval air traffic except that involving urgent official business which cannot be properly handled by landing at Floyd Bennett Field.

CIVIL SPECIAL NOTICES

CIVIL DATA: The Airman's Guide covers primarily two broad fields of civil airport information, namely so-called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout, servicing, lighting, or permanent obstructions of existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or constructions, or merely a burned-out obstruction light or a runway partially unusable because of construction.

Obviously, temporary hazardous conditions should be reported to the aeronautical public at once. The necessity for reporting additional aids or minor changes in existing aids, however, isn't nearly as cogent. In other words, a temporarily closed airport is ordinarily of much more importance from a safety viewpoint than is a new airport, and the aeronautical public should be told about it as expeditiously as possible.

Notamizing of advice covering a field unusable because of flood or snow, a runway closed because of construction, or the erection of a pole-line in an approach, doesn't necessitate an engineering background on the part of the reporter. Too, safety frequently necessitates the notamizing of such advice before an official check can be made. On the other hand, advice covering permanent airport data changes, such as a new airport, or a lengthened landing strip, or an additional hangar, obviously doesn't require the same expeditious transmission to the aeronautical public, and the data may be checked from an engineering standpoint and for standardization before being publicized.

SUMMATION: (a) Since the aeronautical public should be immediately advised of hazardous conditions, reporters should utilize the CAA Airways Communications Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a notam and for further transmission to the publishers of the Airman's Guide.

(b) Permanent airport data changes (as differentiated from temporary hazardous conditions) should be reported to the appropriate CAA District Airport Engineer for coordination before they are included in the Airman's Guide.

DIRECTORY OF AIRPORT NOTAMS: Because of space limitations, the airport directory perforce serves as a notam supplement. Notam data revising previous directory issues are indicated by prefixed arrows. The only airport data (other than temporary conditions) carried in the Notices to Airmen section are coordinates (latitude and longitude).

ACKNOWLEDGMENT OF SUBMITTED AIRMAN'S GUIDE DATA: An under-manned staff prevents an individual acknowledgment of data submitted for inclusion in the Airman's Guide by telegram, teletype dispatch, or letter. Your cooperation in permitting a Guide citation to suffice as an acknowledgment will be appreciated.

CIVIL USAGE OF MILITARY FIELDS: USAF and Navy fields are open to civil fliers only in emergency or with prior permission of the commanding officers thereof.

CIVIL USE OF MILITARY GCA UNITS: It must be recognized that, while Navy and Air Force GCA units may be used by civil fliers in emergency or by prior arrangement with the C.O. of the fields having such units. CAA-established civil ceiling and visibility minimums of 400' and 1 mile respectively are mandatory, except in emergency.

RE-ACTIVATION OF DANGER AREAS: Many new danger areas are being activated and the activity of existing ones is being intensified. Several recent near-accidents and complaints from Army, Air Force, and Navy installations about danger area violations serve to re-emphasize the importance of avoiding such areas.

With the cessation of war the majority of danger areas could be, and were, entered or flown over with impunity. Today this is no longer the case. Do not enter a danger area without prior permission! Be sure your charts spot all new areas!

USE OF AIRPORT UTILITY FREQUENCIES - 121.9 AND 121.7 MCS: The airport ground control frequencies of 121.9 mcs (standard civil channel) and 121.7 mcs (alternate channel) are provided to eliminate the frequency congestion caused by numerous radio contacts between the tower and taxiing aircraft and the tower and airport utility vehicles thus providing a clear VHF channel for arriving and departing aircraft. The ground control frequency is used for the issuance of taxi information, clearances, and any other contacts between the tower and aircraft or vehicles operating on the airport.

Landing aircraft should guard the appropriate ground control frequency (normally 121.9 mcs) as soon as the aircraft has cleared the active runway. At locations where a ground control frequency is not available or the aircraft is not equipped with the VHF ground control channel, the tower will handle all transmissions to aircraft on the ground over its low frequency channel (278 kcs or equivalent). Departing aircraft should communicate with the control tower on the appropriate ground control channel (121.9 or 121.7 mcs) for taxi and clearance information and should remain tuned to that frequency until the pilot is ready to request take-off clearance. At that time, the pilot should communicate with the tower on the appropriate airborne VHF channel. Further communication with the tower, if necessary, should be made on the latter frequency. Aircraft not VHF equipped should guard the tower low frequency channel (278 kc or equivalent) for taxi information and take-off clearance.

V.H.F. IFR FLIGHTS: Until further notice, Air Traffic Control will be exercised on the assumption that aircraft are utilising intermediate frequency radio ranges.

If a pilot desires to conduct IFR flight using VHF ranges over all or a portion of the route, his flight plan should so indicate. Further, flights should not be conducted on civil airways in IFR weather using VHF ranges unless the A.T.C. clearances so authorize.

PRIVATE FLIER VHF FREQUENCIES: CAA Communications Stations and Towers grd the private flier frequencies of 122.1 mc for transmission to CAA Communications Stations and 122.5 mc for transmission to CAA operated towers.

CAA Communications Stations normally reply to itinerant aircraft on the voice feature of the range, low frequency or VHF, whichever is applicable. Replies are made on 111.1 mc if VHF reply has been requested on other than range frequency. CAA airport control towers will reply to itinerant aircraft on towers' low frequency or on one of the frequencies in the 118.3 to 121.3 mc band as cited in the "Transmitting Frequencies and Identifiers" listing on page VI.

RADIOTELEPHONE COMMUNICATIONS: The word ROGER in radiotelephone communications means "I have received all of your last transmission", and its use in any other sense by CAA stations and towers is not authorized. In order to avoid confusion it is suggested that pilots engaging in air-ground contacts also limit the use of ROGER to acknowledgment of transmissions.

Pilots enroute are requested to avoid, if possible, calling airway communications stations at or about 15 and 45 minutes past the hour (which are the scheduled broadcast times) to request weather information, as such calls may delay starting of scheduled broadcasts and cause inconvenience to other persons who are dependent on the broadcasts for weather reports.

VISUAL-AURAL RANGE (VAR) MONITORING: Only visual courses of VAR facilities are monitored continuously

---

RADAR BEACONS: The radar beacon is an electronic beacon designed to serve as an aid to aircraft navigation for such aircraft as are equipped with proper radar equipment. Its purpose is somewhat similar to ordinary low frequency radio ranges, but radar beacons furnish more information. From a radar beacon signal, the radar operator of an aircraft can obtain both the range and azimuth of the beacon. The signal is also coded, so the particular beacon can be identified by reference to a chart or radar beacon list. Thus, the radar operator can obtain rapidly a navigational "fix". Microwave beacons transmit only when interrogated by a special radar pulse length reserved for this function alone.

The essential difference between a radar and a radar beacon is that, unlike the radar, which depends on a reflection of its own energy to determine the existence and position of an object, the radar beacon is made up of a receiver-transmitter combination which sends out a coded signal when actuated or "triggered" by a radar signal of the proper frequency in order to receive the radar beacon signals "triggered" by the radar set.

An advantage of radar beacon is that a single beacon in an area will enable aircraft to navigate under all weather conditions if fitted with the necessary radar interrogating equipment, and at a much greater range than radar alone.

"Racon List, Book I", Hydrographic Office Publication No. 520, gives location, code, operating agency, and all information necessary to use these radar beacons.

BONE-SHAPED (DUMB-BELL) FAN MARKERS: The bone-shaped fan markers have been commissioned primarily for approach control purposes as they provide a more definite holding pattern being only 1-1/2 miles wide through the center of the pattern instead of 3 miles as in the elliptical shaped fan marker. Eventually all approach control fan markers will be bone-shaped. In some cases fan markers taken over from other agencies, especially the Navy, are not used for approach control purposes even though they have the bone-shaped pattern which will be retained.

USE OF THE ILS GLIDE PATH: The glide path course is normally adjusted to 2.5° to 3° above the horizontal so that it intersects the middle marker at about 200 feet and the outer marker at about 1100' above the ground at touch-down point. In addition, to the desired path, all glide path facilities inherently produce five additional courses at high vertical angles (the lowest at approximately 16°).

The proper use of the glide path facility requires that the pilot maintain alertness as the glide path intersection is approached and interpret correctly the "fly-up" and "fly-down" instrumental indications to avoid the possibility of attempting to follow one of the higher angle courses.

Provided that procedures are correctly followed and fliers are properly indoctrinated in glide path instrumentation, the fact that these high angle courses exist should cause no difficulty in glide path navigation since they will not be encountered.

INSTRUMENT LANDING SYSTEM (ILS) APPROACHES: Pilots are requested to give advance information to Air Traffic Control when planning to make an ILS approach, upon reaching the reporting point preceding the holding fix at airport of intended landing. This will permit assignment to the proper holding pattern and eliminate unnecessary delays in landing. Failure to use this procedure, however, will not preclude the pilot's right to request an ILS approach after reaching the holding point if weather conditions or other factors make such request advisable.

INSTRUMENT APPROACH LIGHT SYSTEMS: Normally neon approach light systems will be operated regardless of the runway being used whenever the light intensity is equivalent to that between dusk and dawn, day or night, regardless of weather conditions or when otherwise necessary or requested.

PROCEDURE FOR INDICATING TEMPORARY LANDING AREA HAZARDS AT C.A.A. INTERMEDIATE FIELDS:

(A) When entire field is unsafe two red flags (days) and red double flashing warning lights (nights) will be prominently displayed from opposite corners of the beacon tower platform.

N.B. All normal fields markings, boundary, approach, obstructions lights, etc. will remain unchanged and will be lighted as usual.

(B) When a portion of the field is unsafe, 2 red flags (days) and red double flashing warning lights (nights) will be displayed from opposite corners of beacon tower. The usable landing area will be outlined with red flags and white lanterns with two white flags and two green lanterns at each end of usable runway indicating best approaches. The remainder of field (unusable portion) will be spotted with red flags. All normal field markings, boundary, obstruction, etc. will remain unchanged except green approach lights will be replaced with red approach lights.

(C) When a small portion of the field is unsafe, two red flags (days) and double red flashing warning lights (nights) will be displayed on opposite corners of beacon tower. Red flags and red lanterns will outline hazard area with several red flags and red lanterns within area.

(D) When one runway is unsafe, two red flags (days), two red lanterns (nights) will be displayed from opposite corners of beacon tower. The unsafe runway will be marked off from remainder of field by a row of red flags and a row of white lanterns with red flags and red lanterns spotted in unsafe area. Green lanterns will mark approach to shortened safe runway with normal green approach lights changed to clear. The green approach lights of unsafe runway will be replaced by red.

SEAPLANE FACILITY DIRECTORY: A Directory of Seaplane Facilities, listing all bases and anchorages on record with the C.A.A. as of April 15, 1948, is available to seaplane owners and operators. Copies have already been distributed to all C.A.A.-recorded seaplane facilities. Owners; or others having justifiable need for the directory, should address their requests to: Office of Aviation Information, Attention: A-258, Civil Aeronautics Administration, Department of Commerce, Washington 25, D. C.

FLIGHT INFORMATION MANUAL USE OF "WRP" IN CLASSIFYING THREE-LETTER LOCATION IDENTIFIERS: The contraction "WRP", as used in Chapter I of the current Flight Information Manual, indicates merely a visual reporting point (as distinguished from compulsory or non-compulsory reporting points, which are radio fixes). These WRPs (which should have been classified VRPs) were established at the request of the airlines for their own use.

FLIGHT INFORMATION MANUAL SUPPLEMENT: Flight Information Manual Supplement, dated April 15, 1948, supersedes in entirety Chapters XII and XIV of the January 1, 1948, Flight Information Manual. At the time the January 1, 1948, Manual went to press the

Minimum Enroute Instrument Altitudes and Instrument Approach Procedures were being revised in accordance with the recommendations of the President's Special Safety Board. This Board raised minimums in many cases, and these revised minimums are all reflected in the Flight Information Manual Supplement of April 15, 1948.

✓ CORRECTIONS AND CHANGES FOR FLIGHT INFORMATION MANUAL SUPPLEMENT DATED APRIL 15, 1948: (A) Instrument Approach Procedures-Low Frequency Ranges:

(1) LEBO, KANS., CAA Int. Fld: (a) Change minimum initial approach altitudes to: NE-2300' (SE leg Topeka); SE-2300' (N leg Chanute); SW-2600' (W leg Chanute); NW-2300' (SW leg Topeka), (b) Change procedure turn min. alts to 2300' at all given distances. (c) Change min. alt over range to 1760'. (d) Change regular minimums to: 600', 1.5 - 600', 1.5. (e) Add straight-in minimums as being: NA, day and night. (f) Change remarks column to: If not contact over range, climb to 2300' on NW leg.

(2) MIAMI, FLA., Miami International Arpt: (a) Change min. initial approach column as follows: N-1400' (W. Palm Beach Range); E-1400' (NW leg Nassau); SE-1400' (E leg Key West); W-1200' (SE leg Ft. Myers). (b) Change final approach leg to: W. (c) Procedure turns should be made on S side of W leg. (d) Change bearing and distance, station to airport to: 85°, 5.8 mi. (e) Change straight-in night minimums to 500' and 1.0 mi. (f) Change remarks column to: Climb to 1400' on E leg.

(3) MUSKEGON, MICH., Muskegon Co. Arpt: (a) Change min. initial approach column as follows: NE-Min. enroute alt; SE-1900' (SW leg Grand Rapids); SW-Min. enroute alt; NW-Min. enroute alt. (b) Procedure turns should be made on E side of SE leg. Change min. alt for procedure turns 25 miles from stn to: 1900'. (c) Change regular night minimums to 500' and 2.0 miles. (d) Change remarks column to: Climb to 2000' on NW leg. Minimums given are for DC-3 and smaller acft only.

(4) WINDSOR, ONT., CANADA, Detroit City Arpt: (a) Change min. initial approach from SW to: 2300' (SE leg Romulus). (b) Change min. alt over range to 1625'. (c) Change distance, station to airport to: 9.0 miles. (d) Change ceiling and visibility minimums to: R: 1000', 3.0 or 700', 1.0*, day and night; S: 1000', 3.0 or 700', 1.0*, day and night; A: 1000', 3.0, day and night; T: 500', 1.0, day and night, or 300', 1.0, Runway 33 only, day. (e) Change remarks column to: Climb to 2300' on NW leg. *Min. alt Windsor range to (DET) H facility is 1625'. Descent to 1325' permitted H fac to airport providing positive position of aircraft over H facility is determined by ADF. Distance range to H is 6.4 miles, H to airport is 2.6 miles. Sliding scale not applicable for minimums.

✓ AMENDMENTS TO PUBLISHED MINIMUM ENROUTE INSTRUMENT ALTITUDES: Correct Minimum Enroute Altitudes, carried in the Flight Information Manual Supplement, dated April 15, 1948:

✓ AERONAUTICAL CHART AND PUBLICATIONS CORRECTIONS: (1) Correct Winston Salem Sectional Aeronautical Chart, dated April 21, 1948, by changing ident. and code from CHW - . - . . . . . - - to HI . . . . . on the Huntington, W. Va. Radio range.

(2) Correct Winston Salem Sectional Aeronautical Chart, dated April 21, 1948, by changing the ident and code from KN - . - - . to CHW - . - . . . . . - - on the Charleston, W. Va. radio range station.

✓ REDESIGNATIONS OF DESIGNATED (COMPULSORY) REPORTING POINTS: Effective July 6, 1948, part 601.9 was amended to read in part or in whole as follows:

(1) Green Airway No. 6 (Laredo, Tex. to Norfolk, Va.): . . . Alice, Tex. range stn; Corpus Christi, Tex. range stn; Palacios, Tex. range stn; intersection of SE course Richmond, Tex. and SW course Houston, Tex. . . .

(2) Amber Airway No. 4 (Brownsville, Tex. to Minot, N.D.): Brownsville, Tex. range station; intersection of N course Alice, Tex. and S course Alamo, Tex.; Alamo, Tex. range station . . . and . . . Huron, S.D. range stn; Aberdeen, S.D. range stn.

(3) Amber Airway No. 9 (Charleston, S.C. to Norfolk, Va.): Myrtle Beach, S.C. VHF range stn; Wilmington, N.C. VHF range stn; New Bern, N.C. VHF range stn; Williamston, N.C. VHF range stn.

(4) Red Airway No. 1 (Portland, Oreg. to Kansas City, Mo.): . . . Baker, Oreg. range stn; Boise, Idaho range stn; Gooding, Idaho marker stn; Burley, Idaho range stn . . .

(5) Blue Airway No. 5 (Galveston, Tex. to Wichita, Kans.): Galveston, Tex. range stn; Intersection NW course of Houston, Tex. and NE course of Richmond, Tex; Bryan, Tex. range stn; intersection N course of Ft. Worth, Tex. and N course of Dallas, Tex.

✓ AIRPORT CONTROL ZONE AMENDMENTS: Effective July 6, 1948, Section 601.8 (a) (3-Mile Control Zones) was amended by adding the following airport:

Willow Grove, Pa., Naval Air Station.

Section 601.8 (b) (5-Mile Control Zones) was amended by adding the following airports:

Salinas, Calif., Salinas Airport; Naknek, Alaska, Naknek Airport; Idaho Falls, Idaho, Idaho Falls Airport.

Section 601.8 (c) (Additional Control Zones) was amended by adding or revising the following airports:

Philadelphia, Pa. control zone: Within a 5 mile radius of the Philadelphia International Airport and within 2 miles either side of the W course of the Philadelphia radio range extending to the Boothwyn FM. Wheeling, W. Va. control zone: Within a 3 mile radius of the Wheeling-Ohio County Airport extending 2 miles either side of the SW course of the Wheeling, W. Va. VHF radio range to the Wheeling, W. Va. VHF radio range station. Akron, Ohio Control Zone: Within a 5 mile radius of the Akron, Ohio Municipal Airport extending 2 miles either side of the SW course of the Akron, Ohio radio range to a point 10 miles SW of the radio range stn. Cincinnati, Ohio control zone: Within a 5 mile radius of the Lunken Airport extending 2 miles either side of the SW and NE courses of the Cincinnati, Ohio radio range to the Loveland FM. Columbus, Ohio control zone: Within a 5 mile radius of the Port Columbus Municipal Airport extending 2 miles either side of the W course of the Columbus, Ohio radio range to the Hilliard FM and extending 2 miles either side of the E course of the Columbus, Ohio radio range to the Newark FM. Dayton, Ohio control zone: Within a 5 mile radius of the Municipal Airport extending 2 miles either side of the W course of the Dayton, Ohio radio range to the Verona FM. Flint, Mich. control zone: Within a 5 mile radius of the Bishop Airport extending 2 miles either side of a track of 344° magnetic to a point 10 miles NW of the airport. Moline, Ill. control zone: Within a 5 mile radius of the Moline Municipal Airport extending 2 miles either side of the ILS localizer course to a point 16 miles NW of the ILS localizer. Rockford, Ill. control zone: Within a 5 mile radius of the Machesney Airport and within 2 miles either side of the center line of the W course of the Rockford, Ill. radio range, extending 10 miles W of the radio range station. Fresno, Calif. control zone: Within a 5 mile radius of Hammer Field extending to and including a 3 mile radius of Chandler Field, and extending 2 miles either side of the NW and SE course of the Fresno, Calif. radio range to a point 10 miles from the radio range station. Los Angeles, Calif. control zone: Within a 5 mile radius of the Municipal Airport extending 2 miles either side of the E course of the Los Angeles, Calif. radio range to a point 6 miles E of the airport and extending 2 miles either side of the NW course of the Los Angeles, Calif. radio range to the Burbank, Calif. control zone. Zanesville, Ohio control zone: Within a 5 mile radius of the Zanesville Airport extending 2 miles either side of a track 180° magnetic to a point 10 miles S of the airport. Philadelphia, Pa. control zone: Within a 5 mile radius of the North Philadelphia Airport extending 2 miles either side of the NE course of the Philadelphia radio range to a point 10

miles NE of the radio range station. Iowa City, Iowa control zone: Within a 5 mile radius of the Iowa City Airport extending 2 miles either side of a track 85° magnetic from the airport to its intersection with the N course of the Burlington, Iowa radio range. Vero Beach, Fla. control zone: Within a 5 mile radius of the Vero Beach Airport extending 2 miles either side of a track 339° true to a point 10 miles NW of the Airport. Norfolk, Va. control zone: Within a 5 mile radius of the Naval Air Station excluding that portion which lies within the Norfolk Municipal Airport control zone. Quonset Point, R.I. control zone: Within a 5 mile radius of the Naval Air Station excluding that portion which lies within the Providence, R.I. control zone. Miami, Fla. control zone: Within a 5 mile radius of the Naval Air Station centered on latitude 25° 52' 45", longitude 80° 15' 00" excluding that portion which lies within the Miami International Airport control zone.

✓ AIRWAY TRAFFIC CONTROL AREA EXTENSIONS: Effective July 6, 1948, section 601.4 (e) was amended by revoking the following Airway Traffic Control Area Extensions:

Moline, Illinois — Meridian, Miss.

Section 601.4 (e) was amended by adding or revising the following Airway-Traffic Control Area Extensions:

Jacksonville, Fla.: From the Jacksonville, Fla. radio range stn extending 4 mi N and 5 miles S of the E course of the Jacksonville, Fla. radio range to a point 10 miles E of the radio range stn, and extending 5 miles either side of the ILS localizer course to a point 10.5 miles SW of the ILS outer marker excluding that portion which lies S of latitude 30° 16' 45". Meridian, Miss.: From the Meridian, Miss. radio range stn extending 5 miles either side of the N course of the Meridian, Miss. radio range to a point 20 miles N of the radio range stn and extending from the ILS localizer 5 miles either side of the localizer course to a point 30 miles S of the ILS localizer. Flint, Mich.: From the Flint, Michigan non-directional radio beacon extending 5 miles either side of a track of 344° magnetic to a point 20 miles NW of the non-directional radio beacon. Rockford, Ill.: From the Rockford, Ill. radio range stn. extending 5 miles either side of the W course of the Rockford, Ill. radio range to a point 20 miles W of the radio range stn. Fort Riley, Kans.: Within a 5 mile radius of the Marshall, Kans. AFB, via the Fort Riley (Marshall), Kans. radio range stn extending 1/2 mile on the W side and 5 miles on the E side of the NE course of the Fort Riley (Marshall), Kans. radio range to a point 20 miles NE of the radio range stn. Iowa City, Iowa: Within a 5 mi radius of the Iowa City Airport extending 5 miles either side of a track 85° magnetic from the Airport to its intersection with the N course of the Burlington, Iowa radio range.

✓ REDESIGNATIONS OF CIVIL AIRWAYS: Effective July 6, 1948, Part 600.4 of the Regulations of the Administrator was amended to read in part or in whole as follows:

(1) Amber Airway No. 7 (Key West, Fla. to Caribou, Me.): . . . Miami, Fla. range stn; the intersection of the E course of Miami, Fla. and the S course of West Palm Beach, Fla.; West Palm Beach, Fla. range stn; the intersection of the N course of West Palm Beach, Fla. and the SE course of Melbourne, Fla.; Melbourne, Fla. range stn . . .

(2) Red Airway No. 62 (Toledo, Ohio to Akron, Ohio): From the intersection of the SE course of Romulus, Mich. and the W course of Cleveland, Ohio via the intersection of SE course of Romulus, Mich. and the W course of Wellington, Ohio VHF; Wellington, Ohio VHF range stn to the intersection of the E course of Wellington, Ohio VHF and the NW course of Akron, Ohio.

(3) Red Airway No. 68 (El Paso, Tex. to Fort Worth, Tex.): From the El Paso, Tex. range stn via the intersection of the S course of El Paso, Tex. and the W course of Hudspeth, Tex. VHF; Hudspeth, Tex. VHF range stn . . .

(4) Blue Airway No. 41 (New York, N.Y. to U.S.-Canadian Border): . . . From the Bangor, Me. range stn to the intersection of the NE course of Bangor, Me. and the U.S.-Canadian Border excluding that portion lying more than 3 miles SE of the NE course of Bangor, Me. range stn between the range stn and a point 25 miles NE.

(5) Blue Airway No. 50 (Bangor, Me. to U.S.-Canadian Border): From the intersection of the SE course of Bangor, Me. and the SW course of Pennfield Ridge, N.B. to the intersection of the SW course of Pennfield Ridge, N.B. and the U.S.-Canadian Border.

THREE-LETTER IDENTIFIER KEYING CHANGE-OVER: Hereafter, the only notice in the Airman's Guide of the three-letter keying change-over will be the current listing of all identifiers indicated on Pages VI through IX.

✓ AIR TRAFFIC CONTROL AREA BOUNDARY REVISIONS: Effective July 1, 1948, the boundary between the Salt Lake City and Denver ATC areas on Green Airway No. 3 was changed to 25 miles East of Sinclair, Wyo. Changes in Flight Advisory Areas were made concurrently.

Effective July 15, 1948, the ATC boundary between the Pittsburgh and Cleveland ATC centers on Red 17 will be relocated to the western edge of Red 20.

Effective July 6, 1948, the Washington ATC Center assumed control of Amber Airway No. 9 from 25 miles SW of Wilmington, N.C. to Norfolk, Va.

Effective July 1, 1948, the Washington-New York ATC area boundary on Amber 7 was relocated to the intersection of the SW leg of Philadelphia, Pa. and the W leg of New Castle, Del. range stations.

✓ ON-REQUEST REPORTING POINT ADDITION: "YARBRO" (intersection N course Memphis and SW course Blytheville)

✓ WEATHER REPORTING SERVICE

Weather Reporting Location	Type of Report	Lat., Long. Elev.	Action Taken
Tillamook, Oreg. (NAS)	3 & 6 hourly & pibals.		Discontinued.
Coalville, Utah	Hourly		Discontinued
New York, N.Y., New York International (Idlewild)	Hourly	40-38, 73-47	Inaugurated
Goldsboro, N C. (Seymour-Johnson Arpt)	SW	35-23, 77-58 110	Inaugurated

Terminal forecasts now available for Old Town, Maine in lieu of Bangor, Maine. Terminal forecasts now available for Quincy, Ill. and Worcester, Mass.

METEOROLOGICAL SERVICES AVAILABLE TO CIVIL PILOTS: Weather forecasting and reporting services for civil aviation are provided by the U.S. Weather Bureau of the Department of Commerce. Observations and reports are made at hourly intervals at approximately 500 stations and special reports are made for sudden changes in weather conditions.

The stations from which forecasts and reports may be obtained fall in three categories as follows:

Airway Forecast Centers: At these 18 offices forecasters are on duty 24 hours of every day to provide forecasts, information, and advice concerning aviation weather.

Albuquerque, N.M.	Denver, Colo.	Minneapolis, Minn.
Atlanta, Ga.	Fort Worth, Tex.	New Orleans, La.
Billings, Mont.	Kansas City, Mo.	Salt Lake City, Utah
Boston, Mass.	La Guardia Field, N.Y.	San Francisco, Calif.
Chicago, Ill.	Los Angeles, Calif.	Seattle, Wash.
Dayton, Ohio	Miami, Fla.	Washington, D.C.

Flight Advisory Weather Service Units: These offices are located in the 26 CAA Airway Traffic Control Centers and are staffed 24 hrs a day to give short range detailed information and advice. The weather service available from FAWS should be particularly helpful to pilots in the air, who can obtain it by calling any Airway Communications Station by radio.

Weather Bureau Airport Stations and Airway Communications Stations: Most of these stations are open 24 hours a day, and weather reports, regional forecasts, and terminal forecasts as distributed by teletype may be obtained from them. In many cases, however, professional forecasters are not on duty throughout the 24 hours at these stations and requests for specific trip forecasts must be made a sufficient time in advance to permit obtaining the information from the appropriate forecast center. Where full meteorological service is required, at least two hours' notice (in addition to communication time) should be given for a flight exceeding 500 miles from point of departure to point of first landing, and at least one hour's notice for flights not exceeding 500 miles.

Requests for trip forecasts should include details of the route to be followed, time of departure, estimated time of arrival, air speed and type of aircraft, flight altitude and whether flights will be made VFR or IFR.

The attention of all pilots is also directed to the fact that weather reports and other information are broadcast at 15 and 45 minutes past the hour from all continuously operated CAA radio range stations. A listing of the commercial weather broadcasts may be obtained by writing to the Chief, U.S. Weather Bureau, Washington 25, D.C.

(7-6-48)

AMENDMENTS TO PUBLISHED MINIMUM ENROUTE INSTRUMENT ALTITUDES:

Correct Minimum Enroute Altitudes, carried in the Flight Information Manual Supplement, dated April 15, 1948:

Airway:		From:		To:		Min. Alt.:	
"	Red 10	"	Fort Worth, Tex.	"	Dallas, Tex.	"	2100
"	Blue 9	"	Duluth, Minn.	"	Canadian Border	"	3300
"		"	Duluth, Minn.	"	Fargo, N.D.	"	3100
"	Red 31	"	Minneapolis, Minn.	"	Stanton, Minn.	"	2500
"		"	Stanton, Minn.	"	Int. SE course Minneapolis and N course Rochester	"	2500
"	Red 36	"	Stanton, Minn.	"	Rochester, Minn.	"	2500
"	Red 23	"	Houghton	"	Canadian Border	"	2500

CORRECTIONS FOR AND ADDITIONS TO USAF T.O. 08-15-1: (1) Correct page 20, by deleting all reference to Seattle NAS ILS. Show Tillamook NAS tower in operation 0800 to sunset.

(2) Correct page 22, by showing MacArthur ILS in continuous operation. Griffiss Airways delete notice that Channel D is inoperative.

(3) Correct page 33, by adding black arrow denoting airways station at Lowry AFB.

(4) Correct page 52, by showing CW call for Palm Beach Airways as WZC, and show racon rather than beacon as unreliable.

(5) Correct page 87, by deleting 4495 kc from transmitting frequencies for Lowry AFB GCA facility.

TELETYPE NOTAMS: Throughout the year climatic conditions (snow storms, floods, etc) render many fields temporarily unusable or unsafe. In addition, there are intermittent maintenance operations in progress on many fields. Radio facilities suffer temporary power failures or course misalignments, and lighting facilities are temporarily inoperative. Because these temporary conditions cannot be given immeidate coverage in the "Airman's Guide", full cognizance must be taken of Teletype Notam service which gives the desired coverage on any facility or field at which teletype transmitting stations are based. Cross-country pilots, accordingly, should consult these Teletype Notams for latest available data on air navigation aids. These teletype notams are posted in CAA Communications Stations and in all Air Force Field and Naval Air Station Operations Offices having teletype drops.

AIRPORT AND RADIO NOTICES

LEGEND

** - New or revised airport, danger area, or miscellaneous data to be inscribed on charts or added to records.

★ - New or revised radio data to be inscribed on charts or added to records.

**ALABAMA:BIRMINGHAM ARPT: 558' obst lgtd twr Rdo Stn WBRC-FM erected 5.5 mi SSW (209° true) at lat 33-29-20, long. 86-47-59. Rdo rcvr rqrd. Sod unsafe when wet. C tn ngts or under IFR, plant S of fld has long taxi and parking strips resembling rnwys. No signal equip. avail. to indicate that clearance is needed for VFR opers at ngt when weather below minimums. (5-25)

★BROOKLEY AFB (MOBILE)-RADIO: USAF GCA fac inop. (6-10) Emerg communs freq of 3117.5 kc avail. when GCA fac operating. (6-30) Too late for GCA page.

DOTHAN-NAPIER FLD: Obst lgts atop 175' water tank 6 mi N inop. (3-23)

**HUNTSVILLE ARPT: 311' (1903' MSL) obst lgtd twr Rdo Stn WHBS erected 3.5 mi NE (47° true) at lat 34-43-42, long. 86-32-18.

JASPER-WALKER CO. ARPT: Avoid new strip-being graded. (3-25)

★MAXWELL AFB (MONTGOMERY)-RADIO: USAF X-band radar bcn installed and on operational status. Ident.: 2-1-1-2. Angular coverage: 360°. Operates cont. (6-29) Lat 32-23-35, long. 86-21-41. Fac lctd in control twr. (6-30) FLD: At ngt or under IFR conditions large depot 1 mi S looks like arpt and lgts give impression of parallel rnwys. (10-17)

ALABAMA:MOBILE-RADIO: Auto. rng monitor. sys inop. (5-13)

MOBILE-BATES FLD: N/S rnwy lgts inop. Equip. on fld. No signal equip. avail. to indicate that clearance is needed for VFR opers at ngt when weather below minimums. (5-26)

MONTGOMERY-DANNELLY FLD: Const NW end NW/SE rnwy along W side NW/SE loading ramp, mrkd. (5-26)

**SYLACAUGA-SYLAVON ARPT: Correct Lat 33-10-30, long. 86-18-15. (5-29)

ARIZONA:DAVIS MONTHAN AFB (TUCSON)-RADIO: CAA twr temp inop. (5-3) FLD: E fld closed-acft parked on rnwys. Former taxi strips 12R and 30L are now open as Rnwy 12R-30L, to be used by lgt acft days only. (5-18)

DOUGLAS-RADIO: MRLW fac will be comm soon at lat 31-30-19.8, long. 109-39-20.4. Freq 379 kc, ident. "DUG". Courses: 50°,120°,230°,300°. Var 14° E. Bear. and dist, stn to fld: 120°, 3 mi. (5-17)

HOLBROOK ARPT: CLOSED (const). (6-17)

HOLBROOK INT FLD: Soon, fld will be discont and soon thereafter the bcn, lgtd wind cone and bndry lgts will be installed and comm at the Holbrook Mun Arpt, 2 mi NNE. (6-7)

PHOENIX: Inst training on Phoenix Rng between 5500' and 9500'.

★PHOENIX-SKY HARBOR ARPT-RADIO: Compass lctr comm at middle mrkr site of CAA ILS. See ILS page. (6-23)

ROOSEVELT-RADIO: Soon, special purpose 2-course VHF aural rng, privately owned will be comm on 110.7 mc, approx 10 mi W of Roosevelt at lat 33-41-00, long. 111-25-00. Call letters: "KAJE". Irregular hrs of oper, but chiefly during daylgt hrs. Freqs to be guarded 122.1,122.5 mc. Stn not to be used for navigation, and is for experimental purposes only. (5-17)

WILLIAMS AFB (CHANDLER)-RADIO: USAF rng unreliable and to be used for training only. (2-3)

WILLIAMS ARPT: New strip being const. Equip. crossing NE/SW strip. (6-14)

YUMA AUX. NO. 1: E/W rnwy closed (fruit storage). (6-24)

YUMA AUX NO. 3: Macadam in piles along W side N/S rnwy. Width reduced to 1/2. (6-24)

ARKANSAS:BATESVILLE ARPT: N/S strip and E end E/W strip under const-unusable. Taxiway to fuel pump hazardous. (4-13)

BLYTHEVILLE ARPT: NE/SW Rnwy open ngts. Green course lgts flash. 2 dashes. (7-1)

BRINKLEY ARPT: NE/SW and SE end of NW/SE rnwys hazardous when wet. Ctn ngts. (3-29)

**FORT SMITH ARPT: Taxi strip connecting E/W rnwy with the Admin Bldg ramp abandoned. (6-25) Equip. E, SE ends fld-const. (6-25)

HARRISON ARPT: N end N/S rnwy, NW end NW/SE rnwy under const. Ctn. (5-17)

HOT SPRINGS-MEMORIAL ARPT: Use rnwys only. (3-23)

PINE BLUFF-GRIDER FLD: Use sod strips only, mrkd with alternate white and yellow mrkrs. Const on W and NW sides of fld. Closed ngts. (6-4)

SEARCY MUN ARPT: Const. (4-13)

CALIFORNIA:ALAMEDA NAS: Maintain high approach on Rnwys 26L and 21. Hvy acft parked these areas. 175' unlgtd cranes 2000' from NE corner fld-ctn ngts and during low visibility. Equip. adj to and on rnwys. Fld on positive control. (2-20)

BAKERSFIELD-KERN CO. ARPT: Temp drilling rig 125' high 5/8 mi SW of S end of Rnwy 16-34, mrkd. (6-15)

BECKWOURTH-PLUMAS CO. ARPT: Rnwys under const. Cross-country students avoid using fld. (2-29)

BURBANK-LOCKHEED AIR TERMINAL: Closed to all trans P-80 acft except on special projects for modification that stn. Right traffic Rnwys 7,15. Approach lgts Rnwy 7 changed to red. Rnwy 13-31 closed (parked acft). (3-22)

**CARPINTERIA-CARSONS RANCH ARPK: Revised data. Correct lat 34-23-30, long. 119-28-45. (2-25)

CASTLE AFB (MERCED): Use Rnwy 12-30 only-acft parked on landing mat. (5-18)

COTATI OLF: Crash truck avail. at Santa Rosa NAAS on req. (10-3)

EL CAJON-GILLESPIE ARPT: Right traffic E take-offs, landings. (3-26)

U. S. DEPARTMENT OF COMMERCE
CIVIL AERONAUTICS ADMINISTRATION
OFFICE OF FEDERAL AIRWAYS

GCA AVAILABLE: How and Where

GROUND CONTROLLED APPROACH (GCA) AVAILABLE TO CIVIL PILOTS AS WELL AS ARMY AND NAVY. All GCA facilities (Air Force, Navy, or CAA) are available to any plane in emergency. To secure GCA assistance, pilots should first call the associated control tower.

In addition to the working frequencies listed below, Air Force and Navy GCA emergency VHF transmissions are made on 140.58 mcs. Simplex service on 3117.5 kcs will be provided at all Air Force and Navy installations to provide an alternate means of communications for scheduled air carrier aircraft. Army towers will relay GCA instructions on 200-400 kcs band to civil aircraft not equipped to receive VHF or HF. Most Navy and CAA GCA units can transmit instructions directly on tower low frequency. No AF units can transmit directly on tower low frequency. Those installations not suffixed by (&) can relay directions on tower low frequency.

A minimum of 30 minutes will generally be required to assemble a GCA crew and prepare the equipment for operation AFTER an alert has been received at those locations not providing continuous service. CAA GCA units, however, operate continuously. Pilots desirous of making practice GCA approaches should make their own arrangements with the tower concerned.

N.B. AF and Navy facilities are available to civil aircraft in emergency or by prior arrangement with the C.O. of the respective AFB, NAS or MCAS. Civil minimums established by the CAA are 400' ceiling and 1 mile visibility except in emergency

(A) = Air Force Facility. G.P. = Glide Path. (L6) = High Intensity Lights. (W) = Without Voice. (&) = On test basis, unmonitored and not to be used for navigation. (7-20-48)

MMK's, OMK's are at the same locations as the middle and outer markers unless otherwise specified.

TRANSMITTING FREQUENCIES AND IDENTIFIERS

It must be remembered that practically all VHF omni-directional ranges (VOR) have not yet been formally commissioned and a great number of the VHF visual-aural ranges (VAR) are in the same status, being on test basis and not to be used for navigation. These on-test basis VHF ranges are indicated by a prefixed asterisk (*) in the following tabulation. (See Page IX for additional facilities)

LEGEND: * = Test basis-not to be used for navigation. (U) = Unmonitored, but usable for navigation R = Low frequency range. VAR = VHF visual-aural range. VOR = VHF omni range.
H = Non-directional Radio Beacon (homing). T = Tower. - = Voice on 111.1 but not on 116.1 mc. + = voice on 111.1 and 116.1 mc.
T(g) = Tower equipped with 121.9 or 121.7 mc transmitter for control of ground traffic.

VAR Monitoring Classification for Air Traffic Control Purposes: Category I = Following conditions must be met: (A) The visual course alignment and signal level are monitored continuously. (B) The aural "A" or "N" sector signal is monitored continuously by the communicator at the associated INSAC. (C) The station identification is monitored continuously by the communicator at the associated INSAC. (D) The aural course alignment is monitored at least once each hour by the communicator at the associated INSAC. N.B. Category I indicated by parenthetical (1). Category II = If all except (D) of the conditions of Category I are met. N.B. Category II indicated by parenthetical (2). Category III - If facility monitored solely through use of an automatic visual course monitor and automatic transfer unit. Normally, VAR's which are not controlled by an INSAC and located too distant from INSAC to be monitored with a VHF receiver will fall into Category III. N.B. Category III indicated by parenthetical (3).

(7-20-48)

DIRECTORY OF AIRPORTS

LEGEND

CITY AND AIRPORT NAME

(When city and airport names are identical, the airport name is omitted in the interest of space-conservation)

(A) Airport name* (with A in Type column) - Owned or leased totally by U.S. Air Force
(N) " (with N in Type column) - Owned or leased totally by Navy
(CG) " (with CG in Type column) - Owned or leased totally by Coast Guard
(NG) " (with NG in Type column) - Owned or leased totally by National Guard
(A) Airport name - Open to civilians but owned or leased wholly or in part by U.S. Air Force, Air Reserve, U.S. Air Force servicing detachment or contract gas usually available.
(N) " - Open to civilians but owned or leased wholly or in part by Navy
(CG) " - Open to civilians but owned or leased wholly or in part by Coast Guard.
(NG) " - Open to civilians but owned or leased wholly or in part by Army or State Government for Air National Guard. Limited servicing and maintenance for transient military aircraft.
(P) " - Civil airport open to military aircraft. (See Note 2).
* " - C.A.A. Intermediate Field.

* Air Force and Navy fields are listed alphabetically by airport name followed by city name in parenthesis.

N.B. ALL AIRPORTS EXCEPT THOSE CITED WITH AN "A" or an "N" IN THE TYPE COLUMN ARE OPEN TO CIVIL FLIERS. AIRPORTS WITH NO PREFIX ARE EXCLUSIVELY CIVIL AIRPORTS.

TYPE

A - U.S. Air Force
C - Commercial
CG - Coast Guard
I - Intermediate
M - Municipal
N - Navy
NG - National Guard
P - Private

LOCATION

The word "miles" has been eliminated because of space limitations. Mileage is that from the center of city to airport.

If orientation features are less than 1/2 mile from the field, distance is not specified.

CLASS

(Sea Level Runway and Strip Requirements)

Class	Strip Length	Runway (Paved) Length
S-1	Less than 1800'	Less than 1800'
1	1800-2699'	1800-2499'
2	2700-3699'	2500-3499'
3	3700-4699'	3500-4499'
4	4700-5699'	4500-5499'
5	5700-6699'	5500-6499'
6	6700-7699'	6500-7499'
7	7700-8699'	7500-8499'
8	8700-9699'	8500-9499'
9	9700' +	9500' +

N.B. Length (of longest runway) minus one-quarter of airport elevation equals effective sea level length.

RUNWAYS

In "longest" column is stated length of longest landing area in hundreds of feet. No differentiation is made between runways and strips as far as number of landing areas in field is concerned.

h - landing area is hard-surfaced or paved
aw - allway field.
(26) - rnwy or strip length not verified by CAA

FACILITIES AND SERVICING

RADIO

R: Incomplete radio facilities (with voice availability), such as ILS, or tower and ILS only.
R1: Control tower voice
R2: Range (or H facility) with voice
R3: Range (or H facility) and tower
R4: Range (or H facility), tower, and ILS

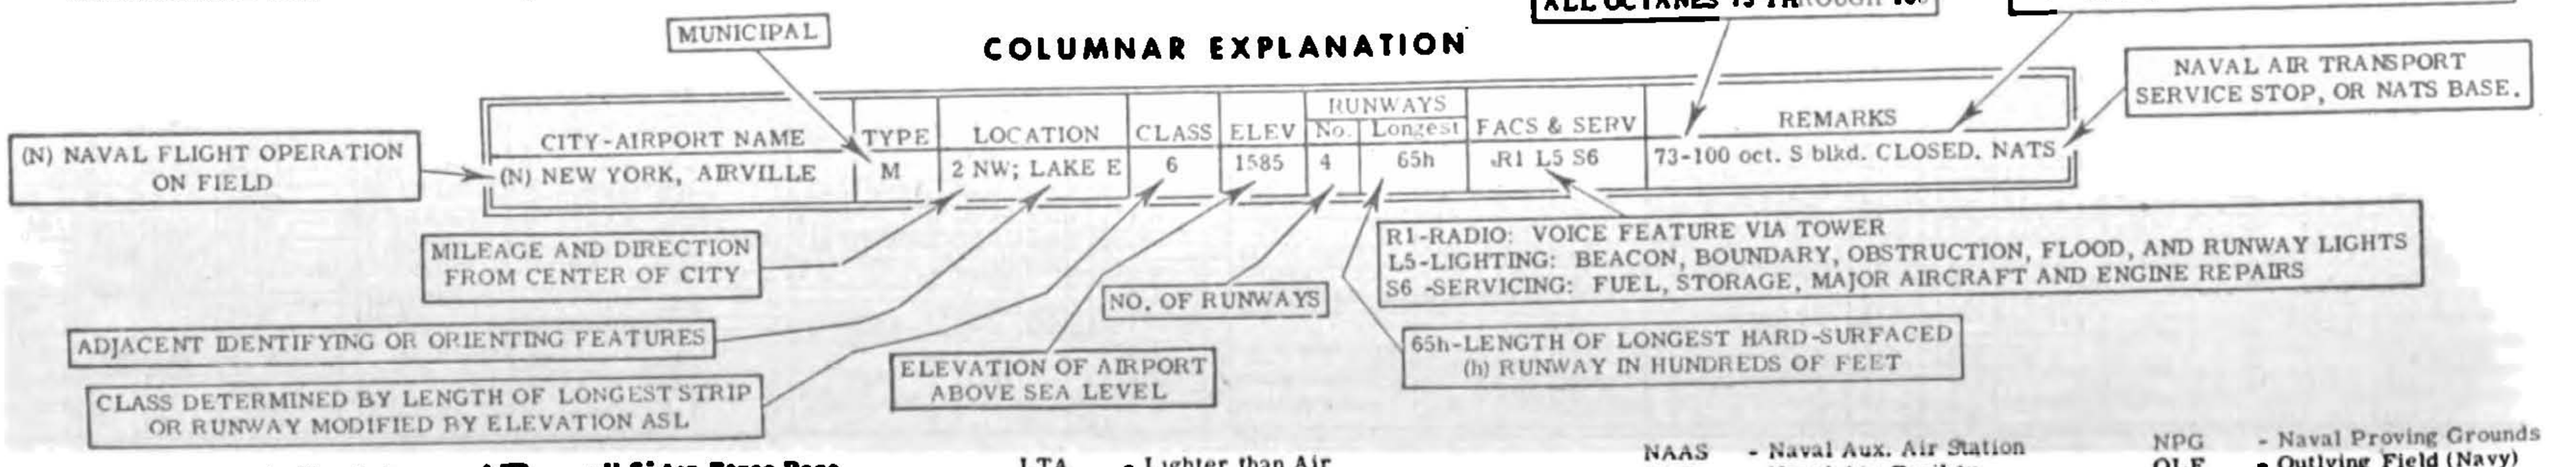
LIGHTS

L: Incomplete lighting, such as flood or strip lights, generally available only on prior request
L1: Beacon only
L2: Beacon and boundary
L3: Beacon, boundary, and obstruction
L4: Beacon, boundary, obstruction, and flood
L5: Beacon, boundary, obstruction, flood, and runway
(L5): Identical to L5 except rnwy lights are high intensity
L6: Beacon, bndry, obst, flood, rnwy, and instr appch
(L6): Identical to L6 except that appch lgts are high intensity
(The class always indicates the highest element available but does not necessarily include all intermediate elements)

SERVICING

S1: Fuel
S2: Ruel, storage
(Any S combination in parenthesis indicates only part time or irregular attendant)
S3: Fuel, storage, minor aircraft repairs
S4: Fuel, storage, minor aircraft, and minor engine repairs
S5: Fuel, storage, major aircraft, and minor engine repairs
S6: Fuel, storage, major aircraft, and major engine repairs

REMARKS



(a) "91 oct" indicates fuel octanes available. "AF" or "Navy" preceding octane indicates USAF or Navy contract fuel available
(b) "CLOSED" indicates closed to all civil aircraft and all transient military aircraft except on official business with written orders this station or in emergency. "CLOSED MIL" and "CLOSED NAVY" on civil fields indicate same restrictions as above are applicable to armed services.
(c) "Port. B-2 lgts" indicates cone-mounted lights outlining runways These lights are portable and may be shifted from runway to runway, or strips.
(d) "INACT-NO FACS." indicates USAF and/or Navy airfields used either exclusively by them or municipal airfields used jointly by them and civil interests at which both the USAF and/or the Navy and the civil interests are inactive. Such airfields will be available to military aircraft at the discretion of the Commanding Officer of the organization to which the acft is assigned.
(e) "USAF and NAVY INACT. CIVIL FACS." indicates municipal airfields used jointly by the USAF and/ or Navy and civil interests at which the USAF, or Navy facilities are inactive but civil facilities are available. Such fields may be used by military aircraft, however, only commercial service is avail.
(f) OBSTRUCTIONS: Because of space limitations only the more dangerous obstructions are indicated. Natural obstructions, like trees, clearly discernible for contact operations, are frequently omitted, for example. On the other hand, all pole lines within at least a 15-1 glide angle are indicated.
(g) "Bcn and/or fld lgts on req" indicates lights are available only by previous phone call, telegram, or letter. It must be remembered that most fields do not have 24-hour operation. Accordingly the lights, indicated for such a lighted field, (and in some instances, even the rotating beacons) are available only by prior request. When an airport classification indicates a lighted field, and there is no notation in the REMARKS column, the lights burn all night or will be turned on when a radio request is made or a plane circles the field.
(h) "FEE" indicates landing charges for revenue producing aircraft.

NOTES

1. ← Notam data revising previous issues.
2. "(P)" in City and Airport Name column indicates: (1) those municipal airports improved with public funds and covered by an agreement between the municipality and the U.S. Government permitting government planes to use such fields in common with others and without charge, to the extent possible without restriction of non-military operations, or (2) other civil airports for which legal permits covering their limited use by military aircraft have been procured and filed with the real estate agency of the Department of the Army.
3. "*Effingham, 10, LS-ID" in City and Airport Name column indicates that the airport is Effingham CAA Intermediate Field, Site 10 on the St. Louis-Indianapolis Airway. Municipal airports where the lights are maintained by the C.A.A. are listed similarly except that there is no prefixed star.
4. AIRLINE STOP airport names are capitalized.
5. PRIVATE AIRPORTS are available for owner only, and not to be used by others except in emergency. Since no servicing is available for transients no "S" combination is ever assigned these fields.
6. "BLKD" indicates approaches where glide angle to runway is 3:1 or less.
7. "(Formerly Air Force)" or "(Formerly Navy)": These former Air Force and Navy fields are in the process of being disposed of by the War Assets Administration and Farm Credit Administration. Their type is difficult of determination currently and they should be used with caution as some, unable to be disposed of as airport property, are being diverted to agricultural purposes.

** At the end of each state, under the heading of NEW AIRPORTS, will be found, out of alphabetical alignment, all the new airports tabulated after the type for that page had been originally set up.

COLUMNAR EXPLANATION

AIRPORT NAME ABBREVIATIONS

AFB - U.S. Air Force Base
CGAS - Coast Guard Air Station
LTA - Lighter than Air
MCAS - Marine Corps Air Station
MCAAF - Marine Corps Aux. Air Facility
NAAS - Naval Aux. Air Station
NAF - Naval Air Facility
NAS - Naval Air Station
NPG - Naval Proving Grounds
OLF - Outlying Field (Navy)

NOTICES TO AIRMEN

AIR FORCES SPECIAL NOTICES

AIR FORCE DATA: Advice covering Air Force fields or Air Force operations on civil fields, or Air Force radio facilities, and also Air National Guard fields and facilities should be forwarded to Commanding General, Air Transport Command, Attention: Flight Operations Division, A-3. Requests for approval of the closing of Air Force airfields or restrictions in airfield facilities to transient military aircraft for over 10 days should be forwarded to the same address for submittal to Chief of Staff, USAF, as required. Restrictions in Air National Guard Fields or facilities will be forwarded to the National Guard Bureau through the State Adjutant General for approval. That Bureau will forward approved restrictions to the above address for publishing. Information to be published will be coordinated and submitted to the Civil Aeronautics Administration.

In connection with the above the attention of all base operations officers is invited to AF Regulation 55-12 of February 20, 1948, subject, "Notices to Airmen", and to AF Regulation 5-16 of February 20, 1948, subject, "Responsibilities for Flight Publications".

AIR FORCE OFFICIAL BUSINESS: Air Force official business within the meaning of AF Regulation 85-2 is interpreted as the necessity for personnel aboard an aircraft to contact personnel, units, or organizations at or near the airfield selected for landing for the purpose of conducting transactions in the service of, and in the interest of, the United States Government. This does not include the use of an airfield by transient aircraft for the purpose of obtaining clearance, service, or other items attendant with itinerant operations. Cross country flights for the purpose of maintaining flying proficiency are not considered to be official business within the meaning of this regulation.

AIR FORCE FOREIGN CLEARING STATIONS: Under the authority of AF Regulation 60-8 of August 28, 1947, U.S.A.F. aircraft with destinations listed below or returning therefrom to the United States will clear through the stations indicated: AFRICA & AZORES - Brookley AFB, Ala., MacDill AFB, Fla., Washington National Airport, D.C., or Westover AFB, Mass. ALASKA - McChord AFB, Wash., or Great Falls AFB, Mont. BERMUDA - Mitchel AFB, N.Y., Brookley AFB, Ala., MacDill AFB, Fla., Washington National Airport, D.C., or Westover AFB, Mass., or Fairfield-Suisun AFB, Calif. CANADA - Great Falls AFB, Mont., Brookley AFB, Ala,, McChord AFB, Wash., Washington National Airport, D.C., Selfridge AFB, Mich., or Westover AFB, Mass. CANAL ZONE, CENTRAL AMERICA, MEXICO, & SOUTH AMERICA - March AFB, Calif., MacDill AFB, Fla., Kelly AFB, Tex., or Brookley AFB, Ala. CARIBBEAN - Brookley AFB, Ala., Kelly AFB, Tex., or MacDill AFB, Fla. ENGLAND, GREENLAND, ICELAND, & NORTH IRELAND Washington National Airport, D.C., or Westover AFB, Mass. NOVA SCOTIA & NEWFOUNDLAND - Washington National Airport, D.C., Westover AFB, Mass., Selfridge AFB, Mich., or Brookley AFB, Ala. HAWAII - Fairfield-Suisun AFB, Calif. EUROPEAN THEATER - Brookley AFB, Ala., MacDill AFB, Fla., Washington National Airport, D.C., or Westover AFB, Mass.

V.H.F. CHANNEL ASSIGNMENTS: Following are USAF assignments:

CHANNEL	AF FREQUENCY	CHANNEL	AF FREQUENCY
A	116.1	H	134.10
B	126.18	U	108.3
C	137.88	V	108.7
D	140.58	W	109.1
G	137.70		

MINIMUM SAFE ALTITUDES ON AIRWAYS: Under USAF Regulation 60-16 and policy of USAF, minimum safe altitudes for flight along airways will be identical to those established by the Civil Aeronautics Administration. Action is being taken to amend pertinent USAF flight information publications to show these minimums.

✓ Indicates new or revised Special Notices

SPECIAL NOTICES

IFR CLEARANCE MINIMUMS FOR CIVIL FIELDS: For IFR clearance to civil fields when minimum altitude over field is not shown on let-down chart contained in T.O. 08-15-3, or Pilots Handbook, USAF policy states that the "REGULAR - DAY" minimum as shown in CAA Flight Information Manual will apply. Necessary action is being taken to amend all charts to show the proper minimums.

OFFICIAL AIR FORCE FIELD DESIGNATIONS: The official names and designations of Air Force Fields have been changed to new designations by the Department of the Air Force General Orders No. 2 of January 13, 1948. The abbreviation "AF Aux." stands for Air Force Auxiliary Field and the abbreviation "AFB" is for Air Force Base.

POLICY ON CONTROL TOWER PROCEDURE: In the interest of decreasing communications load, the practice of tower traffic controller requesting information from incoming aircraft on highest rank aboard will be discontinued. This information will be included in transmission of flight plan over Plan 62 facilities. Other essential information not normally included in flight plan, such as indicating VIP's, will be noted in remarks column and similarly transmitted.

UNAUTHORIZED USE OF VHF EMERGENCY FREQUENCY (140.58 MC): The attention of all operations offices and pilots is invited to AF Letter 100-31, of January 13, 1948, subject, "Unauthorized Use of VHF Emergency Frequency (140.58 mc)".

DIRECT PILOT WEATHER FORECASTER COMMUNICATIONS SERVICE: Direct radio communication between military pilots and AWS weather forecasters is provided at locations and on frequencies given below. This service should be used only for those emergency occasions when the pilot considers direct communication with the weather forecaster is necessary for procurement of special weather data. In normal cases the weather sequences available from Airways Stations and Radio Range Stations is considered adequate.

Procedure: Establish contact with the Military Airways Station on the appropriate frequency and request connection to the weather forecaster:

Location	Frequency (VHF)
Langley Airways, Langley AFB	C
Tinker Airways, Tinker AFB	CAD
March Airways, March AFB	C

✓ **CORRECTIONS FOR AND ADDITIONS TO USAF T.O. 08-15-1:** (1) Correct Canadian data as follows: (a) Page 6, Argentia NAS, Nfld.-Range guards 3017.5, 3105,4495 kc. Weather broadcast at :00 and :30. Twr also transmits on 323,338,6390 kc. (b) Argentia Localizer, Nfld.-Distance station to field: 3.4 mi. Field elev.: 50'. (c) Gander, Nfld.-GCA facility operates on 3017.5 kc instead of 3117.5; (d) Page 20, Port Angeles CGAS-Remarks should refer to H rather than MH facility; (e) Page 32, Ident. of Goodland-GLD; (f) Page 52, Bearing dist. stn to field MacDill AFB (Tampa)-210; (g) Page 66, Los Alamitos NAS transmits and guards 128.70 mc.

(2) Correct listing under following states: Arizona: Marana Aux No. 3 (Red Rack) changed to Marana Aux No. 3 (Red Rock). Florida: Immokalee 40, TPA-MIA, corrected to Immokalee 13, TPA-MIA; Palm Beach-Int (West Palm Beach)-Class: P70V-(L6)-S4. Kansas: Independence AAF-Delete AAF. Louisiana: Tallulah, 36, HON-MPS-change to Tallulah, 36, FTW-ATL; Minnesota: Willmar Int. 16, HR-MP-change to Willmar Int 16, HON-MPS; Nebraska: Chadron 15, CX-HR-change to Chadron, 15, CYS-HON; New Mexico: Acomita 64, LAX-AMA-Class: U41-L3; North Carolina: Asheville-Hendersonville-Class: P41M-L5-S6; Oreg.: Curry Co. (Denmark) SFO-SEA-Delete SFO-SEA; Wyoming: Wamsutter, 22, SLC-DMS-Change to Wamsutter, 22, SLC-OMA.

(3) Correct page 97, by showing Spokane AFB VHF D/F on approx VHF D/F Coverage Map.

(4) Correct Medford, Ore., AFB, by showing tower oper. continuously.

(5) Correct page 31, by showing NE leg of Hayes Center radio range inbound heading of 244°. (Inbound heading of this leg appearing on page 33 is correct).

NAVY SPECIAL NOTICES

NAVY DATA: In accordance with Hydrographic Office Memorandum for Aviators No. 9, July 29, 1946, Hydrographic Office information concerning naval and marine corps air stations and facilities, including changes in field facilities, operation rules, air/ground communications facilities, instrument approach procedures and navigational aids, should be directed to: The Division of Air Navigation, Hydrographic Office, Washington 25, D.C., for transmittal to the CAA. In accordance with Aviation Circular Letter No. 96-46 of June 13, 1946, approval for the closing of any naval or marine corps air station or facility to transient military aircraft for a period in excess of ten days must be obtained from the Chief of Naval Operations. Also, approval is to be obtained from the Chief of Naval Operations before relocation or modification of any aid to air navigation, such as reorientation of radio ranges.

V.H.F. CHANNEL ASSIGNMENTS: To standardize the frequency and channel set-ups for VHF equipment in naval aircraft, the following assignments became effective July 1, 1948, unless otherwise directed by authorized commanders:

CHANNEL	FREQ.	PURPOSE	CHANNEL	FREQ.	PURPOSE
1-A	116.1	CAA stations	5-F		Tactical
2-B	142.74	Navy Towers	6-G	143.64	GCA
3-C	137.88	USAF Airways	7-H	142.02	GCA
Guard-D	140.58	Emergency	8	134.64	GCA
4-E		Tactical	9	126.18	USAF Towers

RESTRICTIONS ON NAVAL AIRCRAFT AT LA GUARDIA FIELD, N.Y., NEW YORK INTERNATIONAL (IDLEWILD) AIRPORT, N.Y., AND NEWARK AIRPORT, N.J.: La Guardia Field, N.Y., New York International (Idlewild) Airport, N.Y., and Newark Airport, N.J., are closed to all Naval air traffic except that involving urgent official business which cannot be properly handled by landing at Floyd Bennett Field.

CIVIL SPECIAL NOTICES

CIVIL DATA: The Airman's Guide covers primarily two broad fields of civil airport information, namely so-called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout, servicing, lighting, of permanent obstructions of existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction, or merely a burned-out obstruction light or a runway partially unusable because of construction.

Obviously, temporary hazardous conditions should be reported to the aeronautical public at once. The necessity for reporting additional aids or minor changes in existing aids, however, isn't nearly as cogent. In other words, a temporarily closed airport is ordinarily of much more importance from a safety viewpoint than is a new airport, and the aeronautical public should be told about it as expeditiously as possible.

Notamizing of advice covering a field unusable because of flood or snow, a runway closed because of construction, or the erection of a pole-line in an approach, doesn't necessitate an engineering background on the part of the reporter. Too, safety frequently necessitates the notamizing of such advice before an official check can be made. On the other hand, advice covering permanent airport data changes, such as a new airport, or a lengthened landing strip, or an additional hangar, obviously doesn't require the same expeditious transmission to the aeronautical public, and the data may be checked from an engineering standpoint and for standardization before being publicized.

SUMMATION: (a) Since the aeronautical public should be immediately advised of hazardous conditions, reporters should utilize the CAA Airways Communications Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a notam and for further transmission to the publishers of the Airman's Guide. (If this is not feasible, the items should be reported directly to the Office of Federal Airways, Attention: A-45, Department of Commerce, Washington 25, D. C.)

(b) Permanent airport data changes (as differentiated from temporary hazardous conditions) should be reported to the appropriate CAA District Airport Engineer for coordination before they are included in the Airman's Guide.

DIRECTORY OF AIRPORT NOTAMS: Because of space limitations, the airport directory perforce serves as a notam supplement. Notam data revising previous directory issues are indicated by prefixed arrows. The only airport data (other than temporary condictions) carried in the Notices to Airmen section are coordinates (latitude and longitude).

AIRPORTS NOT TYPED AS "A" or "N" OPEN TO CIVIL AIRCRAFT: Air Force and Navy aircraft are restricted to their own fields, CAA intermediate fields, and to those civil airports prefixed by an (A), (N), (NG) or (P) in the Directory of Airports section.

Civil airports prefixed by (A) or (NG) have an Air Force or National Guard servicing detachment thereon. Those prefixed by (N) have a Navy (Air) servicing detachment thereon. Those prefixed by (P) have no such servicing detachments but are open to Department of Defense (Air Force, Navy, Army) aircraft.

Under the present Air Force expansion program, the Air Force is activating or re-activating such servicing detachments on a number of civil airports. Such installations on previously (P)-prefixed airports will occasion a prefix change from (P) to (A).

N.B. Unless an airport carries an "A" or an "N" in the type column, it is open to civil aircraft. All airports with no prefixes are exclusively civil fields.

ACKNOWLEDGMENT OF SUBMITTED AIRMAN'S GUIDE DATA: An under-manned staff prevents an individual acknowledgment of data submitted for inclusion in the Airman's Guide by telegram, teletype dispatch, or letter. Your cooperation in permitting a Guide citation to suffice as an acknowledgment will be appreciated.

CIVIL USAGE OF MILITARY FIELDS: USAF and Navy fields are open to civil fliers only in emergency or with prior permission of the commanding officers thereof.

CIVIL USE OF MILITARY GCA UNITS: It must be recognized that, while Navy and Air Force GCA units may be used by civil fliers in emergency or by prior arrangement with the Commanding Officer of the fields having such units. CAA-established civil ceiling and visibility minimums of 400' and 1 mile respectively are mandatory, except in emergency.

REACTIVATION OF DANGER AREAS: Many new danger areas are being activated and the activity of existing ones is being intensified. Several recent near-accidents and complaints from Army, Air Force, and Navy installations about danger area violations serve to re-emphasize the importance of avoiding such areas.

With the cessation of war the majority of danger areas could be, and were, entered or flown over with impunity. Today this is no longer the case. Do not enter a danger area without prior permission! Be sure your charts spot all new areas!

USE OF AIRPORT UTILITY FREQUENCIES - 121.9 AND 121.7 MC: The airport ground control frequencies of 121.9 mc (standard civil channel) and 121.7 mc (alternate channel) are provided to eliminate the frequency congestion caused by numerous radio contacts between the tower and taxiing aircraft and the tower and airport utility vehicles thus providing a clear VHF channel for arriving and departing aircraft. The ground control frequency is used for the issuance of taxi information, clearances, and any other contacts between the tower and aircraft or vehicles operating on the airport.

Landing aircraft should guard the appropriate ground control frequency (normally 121.9 mc) as soon as the aircraft has cleared the active runway. At locations where a ground control frequency is not available or the aircraft is not equipped with the VHF

ground control channel, the tower will handle all transmission to aircraft on the ground over its low frequency channel (278 kc or equivalent). Departing aircraft should communicate with the control tower on the appropriate ground control channel (121.9 or 121.7 mc) for taxi and clearance information and should remain tuned to that frequency until the pilot is ready to request take-off clearance. At that time, the pilot should communicate with the tower on the appropriate airborne VHF channel. Further communication with the tower, if necessary, should be made on the latter frequency. Aircraft not VHF equipped should guard the tower low frequency channel (278 kc or equivalent) for taxi information and take-off clearance.

V.H.F. IFR FLIGHTS: Until further notice, Air Traffic Control will be exercised on the assumption that aircraft are utilizing intermediate frequency radio ranges.

If a pilot desires to conduct IFR flight using VHF ranges over all or a portion of the route, his flight plan should so indicate. Further, flgts should not be conducted on civil arwys in IFR weather using VHF ranges unless the ATC clearances so authorize.

PRIVATE FLIER VHF FREQUENCIES: CAA Communications Stations and Towers grd the private flier frequencies of 122.1 mc for transmission to CAA Communications Stations and 122.5 mc for transmission to CAA operated towers.

CAA Communications Stations normally reply to itinerant aircraft on the voice feature of the range, low frequency or VHF, whichever is applicable. Replies are made on 111.1 mc if VHF reply has been requested on other than range frequency. CAA airport control towers will reply to itinerant aircraft on towers' low frequency or on one of the frequencies in the 118.3 to 121.3 mc band as cited in the "Transmitting Frequencies and Identifiers" listing on page VI.

RADIOTELEPHONE COMMUNICATIONS: The word ROGER in radiotelephone communications means "I have received all of your last transmission", and its use in any other sense by CAA stations and towers is not authorized. In order to avoid confusion it is suggested that pilots engaging in air-ground contacts also limit the use of ROGER to acknowledgment of transmissions.

Pilots enroute are requested to avoid, if possible, calling airway communications stations at or about 15 and 45 minutes past the hour (which are the scheduled broadcast times) to request weather information, as such calls may delay starting of scheduled broadcasts and cause inconvenience to other persons who are dependent on the broadcasts for weather reports.

VISUAL-AURAL RANGE (VAR) MONITORING: Only visual courses of VAR facilities are monitored continuously.

RADAR BEACONS: The radar beacon is an electronic beacon designed to serve as an aid to aircraft navigation for such aircraft as are equipped with proper radar equipment. Its purpose is somewhat similar to ordinary low frequency radio ranges, but radar beacons furnish more information. From a radar beacon signal, the radar operator of an aircraft can obtain both the range and azimuth of the beacon. The signal is also coded, so the particular beacon can be identified by reference to a chart or radar beacon list. Thus, the radar operator can obtain rapidly a navigational "fix". Microwave beacons transmit only when interrogated by a special radar pulse length reserved for this function alone.

The essential difference between a radar and a radar beacon is that, unlike the radar, which depends on a reflection of its own energy to determine the existence and position of an object, the radar beacon is made up of a receiver-transmitter combination which sends out a coded signal when actuated or "triggered" by a radar signal of the proper frequency in order to receive the radar beacon signals "triggered" by the radar set.

An advantage of radar beacon is that a single beacon in an area will enable aircraft to navigate under all weather conditions if fitted with the necessary radar interrogating equipment, and at a much greater range than radar alone.

"Racon List, Book I", Hydrographic Office Publication No. 520, gives location, code, operating agency, and all information necessary to use these radar beacons.

BONE-SHAPED (DUMB-BELL) FAN MARKERS: The bone-shaped fan markers have been commissioned primarily for approach control purposes as they provide a more definite holding pattern being only 1-1/2 miles wide through the center of the pattern instead of 3 miles as in the elliptical shaped fan marker. Eventually all approach control fan markers will be bone-shaped. In some cases fan markers taken over from other agencies, especially the Navy, are not used for approach control purposes even though they have the bone-shaped pattern which will be retained.

USE OF THE ILS GLIDE PATH: The glide path course is normally adjusted to 2.5° to 3° above the horizontal so that it intersects the middle marker at about 200 feet and the outer marker at about 1100' above the ground at touch-down point. In addition, to the desired path, all glide path facilities inherently produce five additional courses at high vertical angles (the lowest at approximately 16°).

The proper use of the glide path facility requires that the pilot maintain alertness as the glide path intersection is approached and interpret correctly the "fly-up" and "fly-down" instrumental indications to avoid the possibility of attempting to follow one of the higher angle courses.

Provided that procedures are correctly followed and fliers are properly indoctrinated in glide path instrumentation, the fact that these high angle courses exist should cause no difficulty in glide path navigation since they will not be encountered.

INSTRUMENT LANDING SYSTEM (ILS) APPROACHES: Pilots are requested to give advance information to Air Traffic Control when planning to make an ILS approach, upon reaching the reporting point preceding the holding fix at airport of intended landing. This will permit assignment to the proper holding pattern and eliminate unnecessary delays in landing. Failure to use this procedure, however, will not preclude the pilot's right to request an ILS approach after reaching the holding point if weather conditions or other factors make such request advisable.

INSTRUMENT APPROACH LIGHT SYSTEMS: Normally neon approach light systems will be operated regardless of the runway being used whenever the light intensity is equivalent to that between dusk and dawn, day or night, regardless of weather conditions or when otherwise necessary or requested.

PROCEDURE FOR INDICATING TEMPORARY LANDING AREA HAZARDS AT C.A.A. INTERMEDIATE FIELDS:

(A) When entire field is unsafe two red flags (days) and red double flashing warning lights (nights) will be prominently displayed from opposite corners of the beacon tower platform.

N.B. All normal fields markings, boundary, approach, obstructions lights, etc. will remain unchanged and will be lighted as usual.

(B) When a portion of the field is unsafe, 2 red flags (days) and red double flashing warning lights (nights) will be displayed from opposite corners of beacon tower. The usable landing area will be outlined with red flags and white lanterns with two white flags and two green lanterns at each end of usable runway indicating best approaches. The remainder of field (unusable portion) will be spotted with red flags. All normal field markings, boundary, obstruction, etc. will remain unchanged except green approach lights will be replaced with red approach lights.

(C) When a small portion of the field is unsafe, two red flags (days) and double red flashing warning lights (nights) will be displayed on opposite corners of beacon tower. Red flags and red lanterns will outline hazard area with several red flags and red lanterns within area.

(D) When one runway is unsafe, two red flags (days), two red lanterns (nights) will be displayed from opposite corners of beacon tower. The unsafe runway will be marked off from remainder of field by a row of red flags and a row of white lanterns with red flags and red lanterns spotted in unsafe area. Green lanterns will mark approach to shortened safe runway with normal green approach lights changed to clear. The green approach lights of unsafe runway will be replaced by red.

SEAPLANE FACILITY DIRECTORY: A Directory of Seaplane Facilities, listing all bases and anchorages on record with the CAA as of April 15, 1948, is available to seaplane owners and operators. Copies have already been distributed to all CAA-recorded seaplane facilities. Owners, or others having justifiable need for the directory, should address their requests to: Office of Aviation Information, Attention: A-258, Civil Aeronautics Administration, Department of Commerce, Washington 25, D. C.

✓ FLIGHT INFORMATION MANUAL USE OF "WRP" IN CLASSIFYING THREE-LETTER LOCATION IDENTIFIERS: The contraction "WRP", as used in Chapter I of the current Flight Information Manual, indicates merely a visual reporting point (as distinguished from compulsory or non-compulsory reporting points, which are radio fixes). These WRPs (which should have been classified VRPs) were established at the request of the airlines for their own use. These will be changed to VRPs in the next Flight Information Manual, going to press August 1, 1948.

FLIGHT INFORMATION MANUAL SUPPLEMENT: Flight Information Manual Supplement, dated April 15, 1948, supersedes in entirety Chapters XII and XIV of the January 1, 1948, Flight Information Manual. At the time the January 1, 1948, Manual went to press the Minimum Enroute Instrument Altitudes and Instrument Approach Procedures were being revised in accordance with the recommendations of the President's Special Safety Board. This Board raised minimums in many cases, and these revised minimums are all reflected in the Flight Information Manual Supplement of April 15, 1948.

✓ FLIGHT INFORMATION MANUAL AMENDMENTS TO LOCATION IDENTIFIER LISTINGS: Chapters I and II of the January 1, 1948, Flight Information Manual and the Airman's Guide, Volume 2, No. 26, dated March 16, 1948, should be amended as follows:

ADDITIONAL LOCATION IDENTIFIERS

Etna, Calif.	VHF R	ENC	Paint Rock, Tex.	INT	PKX
Islip, N.Y.	ILS	ISL	Paris, Idaho, Bear Lake Co. Arpt.		PRR
Litchfield Park NAF, Ariz.		NIY	Red Wood Falls, Minn.	VRP	RWF
Loogootee, Ill.	VHF R	LGE	Rochester (Charlotte), N.Y.	WRP	RCR
Newman, Tex.	H	EWM	Roosevelt Rds NAS, P. Rico		NRR
Niagara, N.Y.	VRP	NGA	Sauvies Island, Oreg.	H	SVY
Norfolk, Va.	ILS	ORK	Yates, Tex.	H	YAT

LOCATION IDENTIFIER DELETION

Abernathy Field, Pulaski, Tenn. Delete ident. AHY, but not the field

LOCATION IDENTIFIER CHANGES

Borinquen Fld, P.R. to be carried as Aguadilla, P.R., Ramey AFB			McComb, Miss. -change VRP to Pike Co. Airport		MCB
			New River MCAS, N.C.		NNR
Calumet, Mich., Houghton, Co. Airport to be carried under Houghton, Mich.			Point Mugu NAMTC, Calif.		NRE
			Wellington, Utah	VRP	ELU

Correct "Airman's Guide", Vol. 3, No. 7, dated June 22, 1948, as follows:

Key West, Fla. (ENE Key West and SE Miami)	Int	KWX	Minto, Alaska (Incorrectly spelled Minot)	VRP	MOY
Miami, Fla., AACS Com. Center		MIF	Palo Pinto, Tex.	Int.	PLP
Midland, Tex.	VRP	MDX	McKean Co. Arpt, Bradford, Pa.		BFD

✓ AERONAUTICAL CHART AND PUBLICATION CORRECTIONS: Correct ILS Chart No. 253, dated 4-27-48, Memphis, Tenn., by showing the rotating beacon located on the S side of the airport rather than the N side; Memphis Tower also transmits on 118.3 mcs; under "Transition to ILS Procedure", the magnetic course from the intersection of the NE course of the Memphis Range and the E course of the ILS, to the outer marker, is 266° instead of 263°.

THREE-LETTER IDENTIFIER KEYING CHANGE-OVER: Hereafter, the only notice in the Airman's Guide of the three-letter keying change-over will be the current listing of all identifiers indicated on Pages VI through IX.

✓ NEW YORK INTERNATIONAL (IDLEWILD) AIRPORT DEDICATION: Military Air Parade will be held at the New York International (Idlewild) Airport at 1400E July 31, 1948. Heavy concentration of all types of aircraft in large formations operating between the altitudes of 1000 and 5000' within the area bounded by Atlantic City, N.J., Philadelphia, Pa., Reading, Pa., Stewart Field, N.Y., Hartford, Conn., and Montauk Point, L.I., N.Y. Heavy bomber type aircraft will rendezvous in the vicinity of Philadelphia, Pa., and fly eastward to the vicinity of Lakehurst, N.J., to seaward, thence N to the New York International (Idlewild) Airport. These aircraft will make a right turn over the New York International (Idlewild) Airport and return via Lakehurst, N.J., to Philadelphia, Pa., and disperse in all directions. Other types of aircraft will rendezvous in all quadrants of the area described above. Main portion of the air parade will form a line 100 miles deep and three miles wide. All pilots exercise extreme caution within this area between the hours of 1200E and 1600E.

WEATHER REPORTING SERVICE

Weather Reporting Location	Type of Report	Lat., Long.	Elev.	Action Taken
Philipsburg, Pa.	Pibals			Discontinued
Ithaca, N.Y.	SW			Not estab. as contemplated
East. Moriches, N.Y.	6-hourly			Discontinued
Moore Haven, Fla.	6-hourly			Discontinued
Curwensville, Pa.	Pibal	41-03, 78-35	2215'	Begun
McComb, Miss.	Hourly			To be avail. soon
Clewiston, Fla.	6-hourly	26-45, 80-55	18'	Inaugurated
Lufkin, Tex. (Angelina Co. Arpt)	Hourly	31-14, 94-46		Inaugurated
Spokane, Wash.	Rawin	47-40, 117-28		To be avail. soon

NOTE: Pibal and MT observational program at Akron, Ohio (Akron Airport) transferred to Canton, Ohio (Canton Co. Airport), effective July 1, 1948. Terminal forecasts for Danville, Va. Municipal Airport to be available soon.

METEOROLOGICAL SERVICES AVAILABLE TO CIVIL PILOTS: Weather forecasting and reporting services for civil aviation are provided by the U.S. Weather Bureau of the Department of Commerce. Observations and reports are made at hourly intervals at approximately 500 stations and special reports are made for sudden changes in weather conditions.

The stations from which forecasts and reports may be obtained fall in three categories as follows:

Airway Forecast Centers: At these 18 offices forecasters are on duty 24 hours of every day to provide forecasts, information, and advice concerning aviation weather.

Albuquerque, N.M.	Denver, Colo.	Minneapolis, Minn.
Atlanta, Ga.	Fort Worth, Tex.	New Orleans, La.
Billings, Mont.	Kansas City, Mo.	Salt Lake City, Utah
Boston, Mass.	La Guardia Field, N.Y.	San Francisco, Calif.
Chicago, Ill.	Los Angeles, Calif.	Seattle, Wash.
Dayton, Ohio	Miami, Fla.	Washington, D.C.

Flight Advisory Weather Service Units: These offices are located in the 26 CAA Airway Traffic Control Centers and are staffed 24 hrs a day to give short range detailed information and advice. The weather service available from FAWS should be particularly helpful to pilots in the air, who can obtain it by calling any Airway Communications Station by radio.

Weather Bureau Airport Stations and Airway Communications Stations: Most of these stations are open 24 hours a day, and weather reports, regional forecasts, and terminal

forecasts as distributed by teletype may be obtained from them. In many cases, however, professional forecasters are not on duty throughout the 24 hours at these stations and requests for specific trip forecasts must be made a sufficient time in advance to permit obtaining the information from the appropriate forecast center. Where full meteorological service is required, at least two hours' notice (in addition to communication time) should be given for a flight exceeding 500 miles from point of departure to point of first landing, and at least one hour's notice for flights not exceeding 500 miles.

Requests for trip forecasts should include details of the route to be followed, time of departure, estimated time of arrival, air speed and type of aircraft, flight altitude and whether flights will be made VFR or IFR.

The attention of all pilots is also directed to the fact that weather reports and other information are broadcast at 15 and 45 minutes past the hour from all continuously operated CAA radio range stations. A listing of the commercial weather broadcasts may be obtained by writing to the Chief, U.S. Weather Bureau, Washington 25, D.C.

A.T.C. AREA BOUNDARY REVISION: Effective August 1, 1948, the Salt Lake City ATC Center will assume control of Red Airway No. 6 from 25 miles W of the Grand Junction, Colo. range station to the "Morman Mesa", Nev. intersection (int. SW course of St. George, Utah, and the NE course of Las Vegas, Nev.).

TELETYPE NOTAMS: Throughout the year climatic conditions (snow storms, floods,etc) render many fields temporarily unusable or unsafe. In addition, there are intermittent maintenance operations in progress on many fields. Radio facilities suffer temporary power failures or course misalignments, and lighting facilities are temporarily inoperative. Because these temporary conditions cannot be given immediate coverage in the "Airman's Guide", full cognizance must be taken of Teletype Notam service which gives the desired coverage on any facility or field at which teletype transmitting stations are based. Cross-country pilots, accordingly, should consult these Teletype Notams for latest available data on air navigation aids. These teletype notams are posted in CAA Communications Stations and in all Air Force Field and Naval Air Station Operations Offices having teletype drops.

AIRPORT AND RADIO NOTICES

LEGEND

** - New or revised airport, danger area, or miscellaneous data to be inscribed on charts or added to records.

★ - New or revised radio data to be inscribed on charts or added to records.

★[redacted]BIRMINGHAM-RADIO: VHF omnirng freq changed to 114.4 mc. (7-13)

BIRMINGHAM ARPT: Rdo rcvr rqrd days, transmitter and rcvr rqrd ngts. Sod unsafe when wet. Ctn ngts or under IFR, plant S of fld has long taxi and parking strips resembling rnwys. No signal equip. avail. to indicate that clearance is needed for VFR opers at ngt when weather below minimums. (7-8)

★BROOKLEY AFB (MOBILE)-RADIO: USAF grnd/air stn grds and transmits on 2862 kc, HF voice 24 hrs daily. (7-12)

**DECATUR SEAPLANE BASE: Remark-Add: Dolly for small acft. (6-22)

DOTHAN-NAPIER FLD: Obst lgts atop 175' water tank 6 mi N inop. (3-23)

** FLORENCE, MUSCLE SHOALS SKYPARK-HARBOR SEAPLANE BASE: New Base. Lat 34-50-00, long. 87-33-15. Lctn: 7 ENE; lake Wilson. Elev 505'. Lane: Unl. Fac & servicing: S4. Remarks: 80 oct. Ramps, floats. Combined opers with arpt. (6-22)

JASPER-WALKER CO. ARPT: Avoid new strip-being graded. (7-8)

★MAXWELL AFB (MONTGOMERY)-RADIO: USAF grnd/air stn oper on 2862 kc in addition to freqs previously published. (7-9) FLD: At ngt or under IFR conditions large depot 1 mi S looks like arpt and lgts give impression of parallel rnwys. (10-17)

MOBILE-RADIO: Auto. rng monitor. sys inop. (5-13)

MOBILE-BATES FLD: N/S rnwy lgts inop. Equip. on fld. No signal equip. avail. to indicate [redacted]: that clearance is needed for VFR opers at ngt when weather below minimums. (5-26)

MONTGOMERY-DANNELLY FLD: Const NW end NW/SE rnwy along W side NW/SE loading ramp, mrkd. (5-26)

[redacted]DAVIS MONTHAN AFB (TUCSON): E fld closed-acft parked on rnwys.. Former taxi strips 12R and 30L are now open as Rnwy 12R-30L, to be used by lgt acft days only. (5-18)

DOUGLAS-RADIO: MRLW fac will be comm soon at lat 31-30-19.8, long. 109-39-20.4. Freq 379 kc, ident. "DUG". Courses: 50°,120°,230°,300°. Var 14°E. Bear. and dist, stn to fld: 120°, 3 mi. (5-17)

HOLBROOK INT FLD: Soon fld will be discont and soon thereafter the bcn, lgtd wind cone and bndry lgts will be installed and comm at the Holbrook Mun Arpt, 2 mi NNE. (6-7)

★LUKE AFB (PHOENIX)-RADIO: USAF grnd/air stn HF CW freq 11445 kc oper on req only. (7-16)

PHOENIX: Inst training on Phoenix Rng between 5500' and 9500'.

ROOSEVELT-RADIO: Soon special purpose 2-course VHF aural rng, privately owned will be comm on 110.7 mc, approx 10 mi W of Roosevelt at lat 33-41-00, long. 111-25-00. Call letters: "KAJE". Irregular hrs of oper, but chiefly during daylgt hrs. Freqs to be guarded 122.1,122.5 mc. Stn not to be used for navigation, and is for experimental purposes only. (5-17)

**SAN SIMON ARPT-New fld. Lat 32-17-00, long. 109-14-15. (4-14)

**TUCSON-THUNDERHEAD ARPT-New fld. Lat 32-08-30, long. 110-43-45. (4-10)

WILLIAMS AFB (CHANDLER)-RADIO: USAF rng unreliable and to be used for training only. (2-3)

WILLIAMS ARPT: New strip being const. Equip crossing NE/SW strip. (6-14)

YUMA AUX NO. 1: E/W rnwy closed (fruit storage). (6-24)

YUMA AUX NO. 3: Macadam in piles along W side N/S rnwy. Width reduced to 1/2. (6-24)

[redacted]BATESVILLE ARPT: N/S strip and E end E/W strip under const.-unusable. Taxiway to fuel pump hazardous. (4-13)

BLYTHEVILLE ARPT: NE/SW rnwy, open ngts. Green course lgts flash. 2 dashes. (7-1)

BRINKLEY ARPT: NE/SW and SE end of NW/SE rnwys hazardous when wet. Ctn ngts.(7-13)

EL DORADO ARPT: 150' obst lgtd water tank being erected 1.2 mi N (10° true) at lat 33-12-15, long. 92-39-40. (6-22)

FORT SMITH ARPT: 100' E end E/W rnwy closed. (7-19)

HARRISON ARPT: CLOSED. (7-6)

PINE BLUFF-GRIDER FLD: Use sod strips only, mrkd with alternate white and yellow mrkrs. Const on W and NW sides of fld. Closed ngts. (6-4)

SEARCY MUN ARPT: Const. (4-13)

CALIFORNIA:ALAMEDA NAS: Maintain high approach on Rnwys 26L and 21. Hvy acft parked these areas. 175' unlgtd cranes 2000' from NE corner fld-ctn ngts and during low visibility. Equip. adj to and on rnwys. Fld on positive control. (2-20)

BAKERSFIELD-KERN CO. ARPT: Temp drilling rig 125' high 5/8 mi SW of S end of Rnwy 16-34, mrkd. (6-15)

BURBANK-LOCKHEED AIR TERMINAL: Closed to all trans P-80 acft except on special projects for modification that stn. Right traffic Rnwys 7, 15. Approach lgts Rnwy 7 changed to red. Rnwy 13-31 closed (parked acft). (3-22)

CASTLE AFB (MERCED): Use Rnwy 12-30 only-acft parked on landi ng mat. (5-16)

**CEDAR KEY SEAPLANE BASE: Revised data. No. of lanes: allway, longest Unlimited. -Tank N. (6-24)

COTATI OLF: Crash truck avail. at Santa Rosa NAAS on req. (30-3)

EL CAJON-GILLESPIE ARPT: Right traffic E take-offs, landings. (3-26)

EL CENTRO NAS: Avail. 0700 to 1800. Other hrs on 30 mins prior notice. (2-24)

★ETNA-RADIO: June 28, VHF omnirng placed in oper on an unmonitored, experimental basis. Freq 114.3 mc, ident changed to "ENC' Stn lctn: lat 41-29-40, long. 122-52-30. Var. 20° E. Class: VORW.

FAIRFIELD-SUISUN AFB-RADIO: USAF ILS temp inop. (5-27)

FRESNO AIR TERMINAL: Traffic pattern 800'. Use rnwys, taxi strips only. (6-23)

HAMILTON AFB (SAN RAFAEL): Extension to Rnwy 12 closed except in emerg. (5-20)

INYOKERN NAF-RADIO: FM on S course of Navy rng temp inop, ident will be changed to 3 dashes. (2-3)

JACKSON-AMADOR CO. ARPT: CLOSED (const). (7-13)

LONG BEACH ARPT-RADIO: Soon, compass lctr will be comm at middle mrkr site of CAA ILS. Freq 254 kc, ident. "B". (5-13) Rnwy 12-30 closed. (6-17)

[redacted]: LOS ALAMITOS NAS (LONG BEACH): Closed 1630 to 0800 except in emerg or by prior arrangement. (4-7)

[redacted]: **CASPER-CENTRAL ARPT: 194' steel structure erected 1.5 mi ESE (106° true) at lat. 42-52, long 106-14, lgtd with one red obst lgt. (6-18)
CASPER AFB: All rnwys unmrkd. (2-4)
CASPER-WARDWELL FLD: Use rnwys, taxi strips only, bal fld rough. 40' unlgtd pole erected at 30 million candle pwr ceilometer projector 1000' N of hangar. (2-17)
★CHEYENNE-RADIO: VHF omnirng stn grds 3105,4495,6210 kc, 116.1, 122.1 mc. (7-9)
CHEYENNE ARPT: Equip. on fld. Use rnwys, taxi strips during wet weather-shoulders soft. (2-20)
KEMMERER INT FLD: Soon will be converted to a mun arpt. Oper and maintenance of fld and lighting facs will be assumed by the City of Kemmerer. (6-18)
LARAMIE-BREES FLD: Sod taxi strip running S from hangars closed. (4-22)
SHERIDAN CO. ARPT: N/S rnwy unsafe hvy acft. Taxi strips parallel all rnwys except N/S rnwy and terminate at ramp. Equip. on fld intermittently. (2-23)
WHEATLAND-EASTSIDE ARPT: CLOSED (const). (6-28)

GCA AVAILABLE: How and Where

GROUND CONTROLLED APPROACH (GCA) AVAILABLE TO CIVIL PILOTS AS WELL AS ARMY AND NAVY. All GCA facilities (Air Force, Navy, or CAA) are available to any plane in emergency. To secure GCA assistance, pilots should first call the associated control tower.

In addition to the working frequencies listed below, Air Force and Navy GCA emergency VHF transmissions are made on 140.58 mcs. Simplex service on 3117.5 kcs will be provided at all Air Force and Navy installations to provide an alternate means of communications for scheduled air carrier aircraft. Army towers will relay GCA instructions on 200-400 kcs band to civil aircraft not equipped to receive VHF or HF. Most Navy and CAA GCA units can transmit instructions directly on tower low frequency. No AF units can transmit directly on tower low frequency. Those installations not suffixed by (&) can relay directions on tower low frequency.

A minimum of 30 minutes will generally be required to assemble a GCA crew and prepare the equipment for operation AFTER an alert has been received at those locations not providing continuous service. CAA GCA units, however, operate continuously. Pilots desirous of making practice GCA approaches should make their own arrangements with the tower concerned.

N.B. AF and Navy facilities are available to civil aircraft in emergency or by prior arrangement with the C.O. of the respective AFB, NAS or MCAS. Civil minimums established by the CAA are 400' ceiling and 1 mile visibility except in emergency

(A) = Air Force Facility. G.P. = Glide Path. (L6) = High Intensity Lights. (W) = Without Voice. (&) = On test basis, unmonitored and not to be used for navigation. (S-1-48)

MMK's, OMK's are at the same locations as the middle and outer markers unless otherwise specified.

TRANSMITTING FREQUENCIES AND IDENTIFIERS

It must be remembered that practically all VHF omni-directional ranges (VOR) have not yet been formally commissioned and a great number of the VHF visual-aural ranges (VAR) are in the same status, being on test basis and not to be used for navigation. These on-test basis VHF ranges are indicated by a prefixed asterisk (*) in the following tabulation. **(See Page IX for additional facilities)**

LEGEND: * = Test basis-not to be used for navigation. (U) = Unmonitored, but usable for navigation. R = Low frequency range. VAR = VHF visual-aural range. VOR = VHF omni range.
H = Non-directional Radio Beacon (homing). T = Tower. - = Voice on 111.1 but not on 116.1 mc. + = voice on 111.1 and 116.1 mc.
T(g) = Tower equipped with 121.9 or 121.7 mc transmitter for control of ground traffic.

VAR Monitoring Classification for Air Traffic Control Purposes: Category I = Following conditions must be met: (A) The visual course alignment and signal level are monitored continuously. (B) The aural "A" or "N" sector signal is monitored continuously by the communicator at the associated INSAC. (C) The station identification is monitored continuously by the communicator at the associated INSAC. (D) The aural course alignment is monitored at least once each hour by the communicator at the associated INSAC. N.B. Category I indicated by parenthetical (1). Category II = If all except (D) of the conditions of Category I are met. N.B. Category II indicated by parenthetical (2). Category III - If facility monitored solely through use of an automatic visual course monitor and automatic transfer unit. Normally, VAR's which are not controlled by an INSAC and located too distant from INSAC to be monitored with a VHF receiver will fall into Category III. N.B. Category III indicated by parenthetical (3).

N.B. All C.A.A. communications stations guard 3105, 4495, 6210, 3117.5 kc, and 122.1 mc, except in a few isolated cases. 3117.5 kc is not guarded by those communications stations operating in conjunction with C.A.A. towers. Some C.A.A. stations guard 116.1 mc, an A.F. frequency. All C.A.A. towers guard 3105, 4495, 6210, 3117.5 kc, and 122.5 mc.

(8-3-48)

DIRECTORY OF AIRPORTS

LEGEND

CITY AND AIRPORT NAME

(When city and airport names are identical, the airport name is omitted in the interest of space-conservation)

A) Airport name* (with A in Type column) - Owned or leased totally by U.S. Air Force
(N) " (with N in Type column) - Owned or leased totally by Navy
(CG) " (with CG in Type column) - Owned or leased totally by Coast Guard
(NG) " (with NG in Type column) - Owned or leased totally by National Guard

(A) Airport name - Open to civilians but owned or leased wholly or in part by U.S. Air Force, Air Reserve, U.S. Air Force servicing detachment or contract gas usually available.
(N) " - Open to civilians but owned or leased wholly or in part by Navy
(CG) " - Open to civilians but owned or leased wholly or in part by Coast Guard.
(NG) " - Open to civilians but owned or leased wholly or in part by Army or State Government for Air National Guard. Limited servicing and maintenance for transient military aircraft.
(P) " - Civil airport open to military aircraft. (See Note 2).
* " - C.A.A. Intermediate Field.

* Air Force and Navy fields are listed alphabetically by airport name followed by city name in parenthesis.

N.B. ALL AIRPORTS EXCEPT THOSE CITED WITH AN "A" or an "N" IN THE TYPE COLUMN ARE OPEN TO CIVIL FLIERS. AIRPORTS WITH NO PREFIX ARE EXCLUSIVELY CIVIL AIRPORTS.

TYPE

A - U.S. Air Force
C - Commercial
CG - Coast Guard
I - Intermediate
M - Municipal
N - Navy
NG - National Guard
P - Private

LOCATION

The word "miles" has been eliminated because of space limitations. Mileage is that from the center of city to airport.

If orientation features are less than 1/2 mile from the field, distance is not specified.

CLASS

(Sea Level Runway and Strip Requirements)

Class	Strip Length	Runway (Paved) Length
S-1	Less than 1800'	Less than 1800'
1	1800-2699'	1800-2499'
2	2700-3699'	2500-3499'
3	3700-4699'	3500-4499'
4	4700-5699'	4500-5499'
5	5700-6699'	5500-6499'
6	6700-7699'	6500-7499'
7	7700-8699'	7500-8499'
8	8700-9699'	8500-9499'
9	9700' +	9500' +

N.B. Length (of longest runway) minus one-quarter of airport elevation equals effective sea level length.

RUNWAYS

In "longest" column is stated length of longest landing area in hundreds of feet. No differentiation is made between runways and strips as far as number of landing areas in field is concerned.

od h - landing area is hard-surfaced or paved
aw - allway field.
(26) - rnwy or strip length not verified by CAA

FACILITIES AND SERVICING

RADIO

R: Incomplete radio facilities (with voice availability), such as ILS, or tower and ILS only.
R1: Control tower voice
R2: Range (or H facility) with voice
R3: Range (or H facility) and tower
R4: Range (or H facility), tower, and ILS

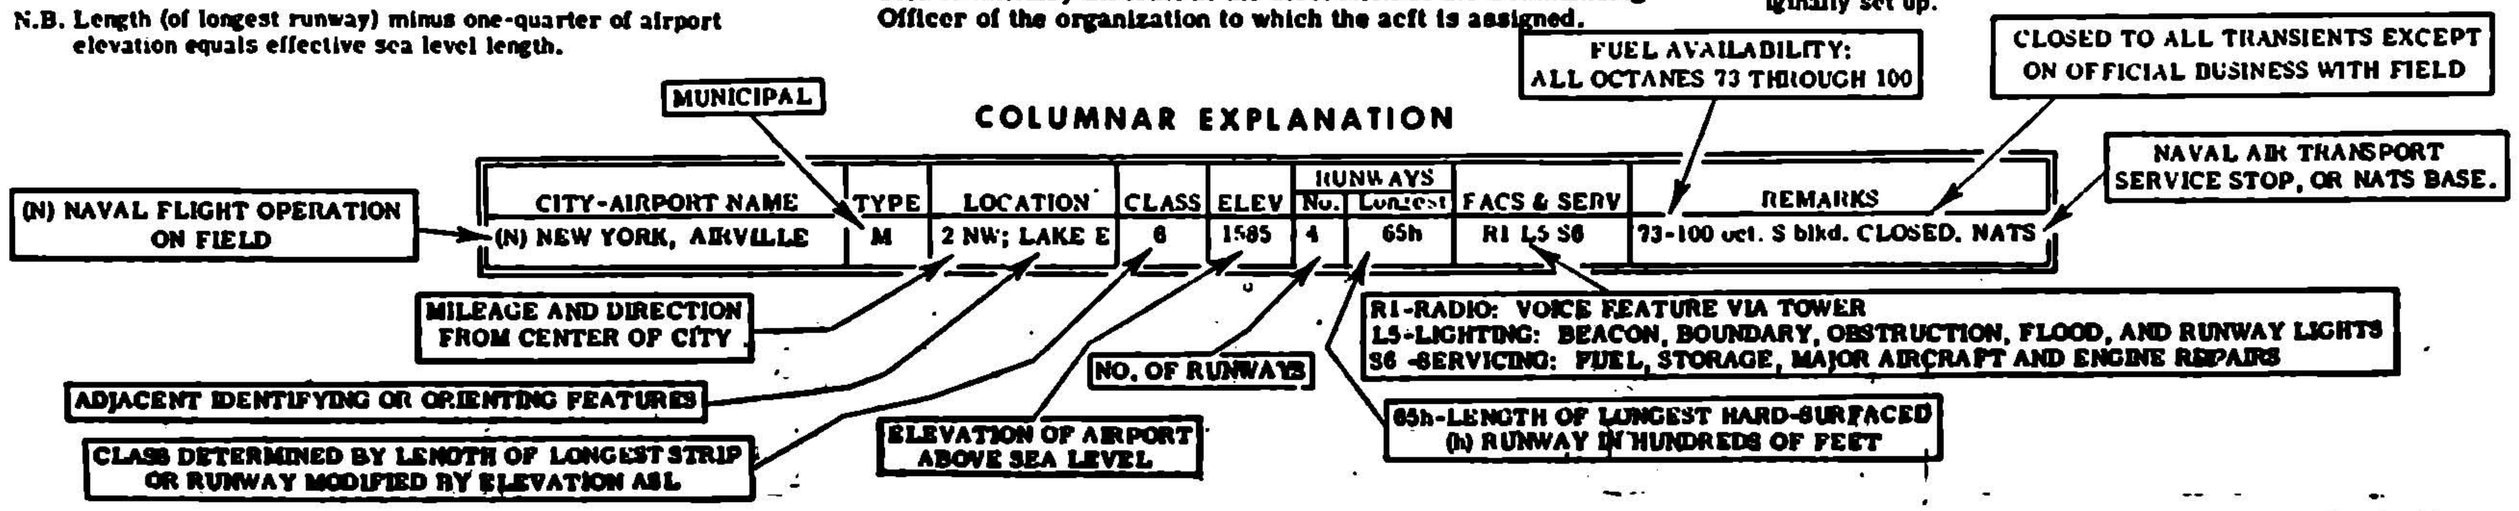
LIGHTS

L: Incomplete lighting, such as flood or strip lights, generally available only on prior request
L1: Beacon only
L2: Beacon and boundary
L3: Beacon, boundary, and obstruction
L4: Beacon, bounriary, obstruction, and flood
L5: Beacon, boundary, obstruction, flood, and runway
(L5): Identical to L5 except rnwy lights are high intensity
L6: Beacon, bndry, obst, flood, rnwy, and instr appch
(L6): Identical to L6 except that appch lgts are high intensity
(The class always indicates the highest element available but does not necessarily include all intermediate elements)

SERVICING

S1: Fuel
S2: Fuel, storage
(Any S combination in parenthesis indicates only part time or irregular attendant)
S3: Fuel, storage, minor aircraft repairs
S4: Fuel, storage, minor aircraft, and minor engine repairs
S5: Fuel, storage, major aircraft, and minor engine repairs
S6: Fuel, storage, major aircraft, and major engine repairs

REMARKS



(a) "91 oct" indicates fuel octanes available. "AF" or "Navy" preceding octane indicates USAF or Navy contract fuel available
(b) "CLOSED" indicates closed to all civil aircraft and all transient military aircraft except on official business with written orders this station or in emergency. "CLOSED MIL" and "CLOSED NAVY" on civil fields indicate same restrictions as above are applicable to armed services.
(c) "Port. B-2 lgts" indicates cone-mounted lights outlining runways These lights are portable and may be shifted from runway to runway, or strips.
(d) "INACT-NO FACS." indicates USAF and/or Navy airfields used either exclusively by them or municipal airfields used jointly by them and civil interests at which both the USAF and/or the Navy and the civil interests are inactive. Such airfields will be available to military aircraft at the discretion of the Commanding Officer of the organization to which the acft is assigned.
(e) "USAF and NAVY INACT. CIVIL FACS." indicates municipal airfields used jointly by the USAF and/ or Navy and civil interests at which the USAF, or Navy facilities are inactive but civil facilities are available. Such fields may be used by military aircraft, however, only commercial service is avail
(f) OBSTRUCTIONS: Because of space limitations only the more dangerous obstructions are indicated. Natural obstructions, like trees, clearly discernible for contact operations, are frequently omitted, for example. On the other hand, all pole lines within at least a 15-1 glide angle are indicated.
(g) "Rcn and/or fld lgts on req" indicates lights are available only by previous phone call, telegram, or letter. It must be remembered that most fields do not have 24-hour operation. Accordingly the lights, indicated for such a lighted field, (and in some instances, even the rotating beacons) are available only by prior request. When an airport classification indicates a lighted field, and there is no notation in the REMARKS column, the lights burn all night or will be turned on when a radio request is made or a plane circles the field.
(h) "FEE" indicates landing charges for revenue producing aircraft.

NOTES

1. ← Notam data revising previous issues.
2. "(P)" in City and Airport Name column indicates: (1) those municipal airports improved with public funds and covered by an agreement between the municipality and the U.S. Government permitting government planes to use such fields in common with others and without charge, to the extent possible without restriction of non-military operations, or (2) other civil airports for which legal permits covering their limited use by military aircraft have been procured and filed with the real estate agency of the Department of the Army.
3. "*Effingham, 10, LS-ID" in City and Airport Name column indicates that the airport is Effingham CAA Intermediate Field, Site 10 on the St. Louis-Indianapolis Airway. Municipal airports where the lights are maintained by the C.A.A. are listed similarly except that there is no prefixed star.
4. AIRLINE STOP airport names are capitalized.
5. PRIVATE AIRPORTS are available for owner only, and not to be used by others except in emergency. Since no servicing is available for transients no "S" combination is ever assigned these fields.
6. "BLKD" indicates approaches where glide angle to runway is 3:1 or less.
7. "(Formerly Air Force)" or "(Formerly Navy)": These former Air Force and Navy fields are in the process of being disposed of by the War Assets Administration and Farm Credit Administration. Their type is difficult of determination currently and they should be used with caution as some, unable to be disposed of as airport property, are being diverted to agricultural purposes.

** At the end of each state, under the heading of NEW AIRPORTS, will be found, out of alphabetical alignment, all the new airports tabulated after the type for that page had been originally set up.

COLUMNAR EXPLANATION

AIRPORT NAME ABBREVIATIONS

AFB - U.S. Air Force Base
CGAS - Coast Guard Air Station
LTA - Lighter than Air
MCAS - Marine Corps Air Station
MCAAF - Marine Corps Aux. Air Facility
NAAS - Naval Aux. Air Station
NAF - Naval Air Facility
NAS - Naval Air Station
NPG - Naval Proving Ground
OLF - Outlying Field (Navy)
